Good Morning guys,

The retrieval went well. We cut the tail off and hauled the wing and cabin section back in one piece.

This way we never did anything to the fuel system which may be in question.

Also we got about 5 gallons of fuel out of the right hand tank. It was leaking when we were at the crash site and I have no idea what leaked out.

We found a cell phone under the wreckage and assume it belongs to the pilot.

Let me know if you have any questions,

Dj2
