Description of Damage to Aircraft and Other Property <i>(Use additional sheet if necessary)</i> Left aileron bent, Propeller broken, landing gear bent, cowling cracked, and the bottom of the rudder bent.		
NARRATIVE HISTORY OF FLIGHT <i>(Please type or print in ink)</i>		
Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible. I departed around 7:00 pm on Saturday evening from my house field for a short sightseeing sunset flight. I took off to the south. I flew around for about 10minutes and then came back to the house. I had a normal approach. coming in from the south. airspeed was around 60mph on final with power at idle. airspeed dropped to 50mph as I was getting closer to rolling out. I started pulling back for the flair and the left wing dropped about 15ft from the ground, I immediately gave full throttle input to correct the stalled wing in which it didnt fully recover as the aircraft touched down on the left gear leg. The gear failed and the left wing tip hit causing the airplane to spin on the ground where the aircraft came to a stop. I shut off the fuel and master and climbed out of the aircraft. I did a quick assessment of the the damage. as the authorities arrived.		

RECOMMENDATION (How could this accident/incident have been prevented?)															
Operator/Owner Safety Recommendation I should have Landed to the south because there was a 5mph south wind. And also kept a medium power setting with a higher airspeed for a longer period of time.
