Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Prop strike, bottom cowling damage, left main gear seperated, left wing tip, left horizontal stabilizer bent, left elevator bent.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

Flying pattern to scout potential landing site on Steens Mountain Road, on a westerly heading. Determined that a go-around was necessary because of auto traffic. Applied full throttle, engine coughed and quit making power. Told passenger to "hold on", and had hard landing in dirt approximately 40' south of roadway. Airplane slid up onto road and across at about 65 degree angle to roadway centerline. Aircraft stopped approximately 20 feet north of roadway at about 130 degree angle to roadway centerline, left wing down. Confirmed passenger and myself had no injuries, and turned fuel off, then exited aircraft. Determined aircraft was stable in its' place, and removed personal affects from aircraft. Secured aircraft as best possible and notified local authorities that we had an airplane down and all involved were unhurt and okay. Terrain was sandy dirt with scrub sagebrush, with scattered large boulders. Time of hard landing was ~1130am PDT, weather conditions were excellent visibility, calm wind conditions, 69 degrees fahrenheit.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

In my securing the aircraft I noticed that the mixture control was still out, ie in the position where we had leaned to at 11,500' on the trip down there. My feeling is that I forgot to richen mixture as we descended and when I applied full throttle there wasn't enough fuel to support combustion.
