

Andrew Swick
Aviation Accident Investigator
AS-WPR

Date: November 12, 2020
Subject: WPR21LA003-Family Contact
Contact: Bob Nimmick-Brother of Pilot

I spoke with Mr. Nimmick, the brother of the pilot, who told me that his brother had completed many of these multileg flights before, between Texas and Montana. The purpose of the trips was personal, and family related. I asked if he had ever diverted on one of these multileg trips before, and he said he was unsure. He told me that he had been watching his brother's flight track on the website FlightAware. I asked Mr. Nimmick if he knew the health of his brother and if he had known of any medications that he may have taken. He reported that he wasn't sure. He was also unsure where the airplane or pilot's logbooks were located.
