Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Of the four external lift struts one was bent. Cracked windscreen, prop tips damaged, External fabric paint scratched and esthetic damage. Lower cowl has superficial dents. Control surfaces intact and operational.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

Departed KMEV approximately 9:30 am on 11/2/20. My intention was to perform 3 stop and go's. The weather was clear and wind was calm.

On final to runway 34, I was 10 mph faster than desired, so I extended my approach down the runway to bleed off some speed. The airplane slowed to desired speed and approach was normal. My landing bounced a bit and I began to veer slightly to the left. As speed was reducing appropriately, I was losing rudder authority. I intentionally applied an appropriate right brake input. My right foot slipped off of the heel brake and on the second attempt to apply rudder, an unintentional brake input occurred. This was partly a result of the size of the heel of my shoe. The nose veered to the right and I necessarily applied left brake. I was almost at a full stop as the tail came up. As the tail came up, the weight of my body was on the brakes and I could not remove the pressure on the brakes in time before the tail gently rolled over the top. I turned off the fuel, all electrical, released myself from the 3 point harness and secured the aircraft.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

- 1) Go around
- 2) Different shoe size
- 3) Accept the veering to the left
- 4) Avoid braking

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

I feel this was an incident as outlined on this form. I disagree with the definitions "B" part 2. Specifically the wording "would normally require major repair or replacement." The bent lifting strut should not be classified as a "major repair."

Further clarification on the definition of major repair needs to be addressed on this form.
