ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

When Cortney Foltz took possession of the Aircraft the morning of the accident, there was an estimated 7-9 gallons of fuel on board remaining from the last flight the night before.

I (B. Chad Cooper) flew the plane in the morning on 11/5/2020 for 2.3hr around the Phoenix area. No issues at all. I checked fuel after my flight, and noted there was 13-14 gallons remaining.

On 11/5/2020 in the afternoon another pilot Kai-i Yen () flew the plane for .9 hours in the Chandler/Mesa area. He did not refuel. No discrepancies noted.

Based on an average fuel burn of 5-6 gallon/hour, I estimate that there was 7-9 gallons of fuel remaining in the plane when Cortney took the plane on 11/6/2020. She did not refuel prior to the flight.

Her flight time (as recorded on <https://flightaware.com/live/flight/N8700G>) shows a flight time of 1hr 27min (not counting taxi and run-up time). If she burned 5 gallons/hour, she would have burned at least 7.5 gallons (not counting taxi and run up). If we add in 15 min for taxi and run-up time, she would have burned 8.75 gallons. Both of these estimates exceed the fuel on board, leading me to the conclusion that she exhausted her fuel supply, which lead to the engine turning off, and the subsequent emergency landing.

For additional information, you'll need to contact the pilot(s) operating the plane at the time of the accident.
