

T/R Dual Lock Duplex Bearing Support

Background

- Installation of the Duplex Bearing locking nut requires several steps including cleaning and use of Loctite products.
- Demand to improve locking system.

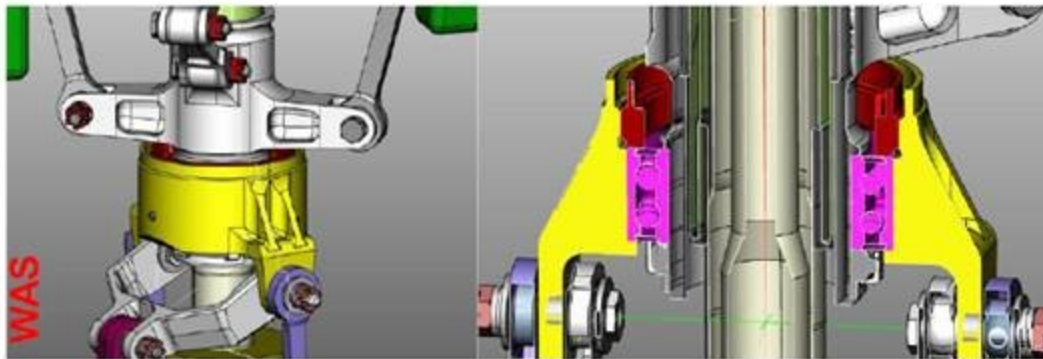

Analysis

- New Support configuration, with improved maintainability and more robust Locking System, similarly to the Main Rotor Swashplate installation.
- Compatible with current Duplex Bearing.

Action plan

- Target for certification Q4 2022.
- Retrofit through SB.
