-UNDETERMINED DAMAGE TO COWLING
-UNDETERMINED DAMAGE TO NOSE LANDING GEAR
-CONSTRUCTION TRACK LOADER VEHICLE DAMAGE TO BACK END, HYDRAULIC LINES, CONTROL ARM, AND SHRAPNEL FROM PROPELLER DISCOVERED IN SEAT

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

When I stopped at spot 6 just before RWY22 Engine run up area, I noticed the construction vehicle. At this time, it was not moving and I felt I had enough separation. I requested to Ground for Full stop and taxi back followed by Red Mt. DEP. When I started to taxi toward Engine run up area I noticed the vehicle was moving and decided to off set to the left. While maneuvering I had a confirmation about ATIS and replied while taxiing. I thought I made enough separation by offsetting to the left, but it was not enough. Next time I checked my right side, it was just before impact. I applied my brakes but my wing tip hit the vehicle first which turned my aircraft around, resulting the midsection of the wing to hit the vehicle. After the impact, the nose wheel fell in the gap of the construction area and I noticed the propeller hit the ground or the vehicle. I immediately stopped the engine and tried to contact ATC. After several tries, the ATC couldn't understand the situation, so I turned off electrical master switch.
