Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft destroyed. Initial impact destroyed the landing gear and the subsequent post-impact fire destroyed the rear section of the aircraft to include the engine, fuselage and root section of both wings. The fuselage forward of the wings was not affected directly by the fire, however there is evidence of heat damage, as well as water and AFFF damage from the fire fighting efforts.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

Incident aircraft was conducting an Automated Takeoff and Landing Capability (ATLC) approach to full stop landing. Incident aircraft origin and destination was KFHU. Intent of flight was for a single takeoff, traffic pattern to a full stop landing. Weather at the time was overcast at 220 with few clouds at 060. Visibility can best be described as 10sm and slightly hazy. Winds were variable at 5kts. Runway in use was KFHU RWY26. RWY26 is currently shortened from 12,001 feet to 9,501ft due to construction on the approach end. The runway is NOTAM'd as being shortened 2,500ft with a non-standard temporary displaced threshold. Incident aircraft conducted normal taxi for takeoff, takeoff, pattern and approach. At 1226MST, incident aircraft touched down in the construction zone with the left main landing gear in an approximately 20ftx160ft hole. The pilot commanded an ATLC go around. The aircraft appeared to attempt this action but did not gain altitude due to the fact that the crash sequence had already been initiated. The landing and subsequent crash sequence resulted in the aircraft remaining on the runway, slightly right of centerline. The aircraft came to a stop approximately 4000ft past the initial contact made with the ground.
