Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Landing gear missing, empennage just aft of baggage compartment bent 90 degrees vertically. Right wing folded/collapsed up into the fuselage. Left wing bent in several locations but remained attached. Engine separated right after initial impact and firewall forward missing. No internal damage to cabin seat area.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On Saturday morning November 14th I drove with my date Christy Fleener to the mud lake airport 1U2. I had to take a look into a helicopter that I was working on to get some information for the owner. The small task was to only take a few minutes and then we were going to spend our morning together before she had to go home and take care of chores. After showing her around my workplace and taking a look at the helicopter I noticed that the wind was calm, sun shining, and the sky was clear and beautiful. I wanted to impress her and asked if she wanted to go for a flight. Admittedly this is where the first mistake was made. I have a bad habit of making poor choices when women are involved. I told her that I wasn't supposed to be flying without a flight instructor. We pre-flighted the airplane while the dogs ran around in excitement. The dogs loaded into the back seat and I briefed Christy as I helped her get situated in the right seat. I started the aircraft and let it warm up. After doing my normal runup and preflight checks I made a radio call and we took the runway. As the aircraft climbed out in the smooth air, I saw her start to relax and smile. The mountains to the west were shining bright and we discussed how beautiful they were. I decided to set a course towards them to provide a better scenic flight. I steadily climbed past 6000 as we crossed over the desert. My course headed towards the south end of the Lemhi range. As we neared with the foothills below us, I turned northbound. We were still climbing and as we hit 10,000 feet, I told Christy how high we were. I headed north along the ridgeline with a heading planning to leave the mountains heading northeast past the point of Saddle Mountain. While admiring the beauty of the mountains we discussed mountain winds and that you wanted to know where the wind was and always have an escape route. However, the irony of my comments wasn't realized at the moment. I was making the very mistakes that I was warning of. The aircraft began to drop altitude suddenly. As I realized that a downdraft was pushing us down, I began to turn to the west trying to find the wind. The wind was definitely blowing across the ridge from the west but the downdraft was getting stronger. I realized that my descent was too great to turn to the west into the wind. I kept lowering my nose to maintain airspeed. I began a turn to the east to try and get altitude as the terrain fell away. However, I could not slow my descent. As the terrain approached, I finally knew we were going to hit and raised the nose as a Hail-Mary effort to clear the ridge. I brought the aircraft into a full stall right before we hit the ridge. We contacted the ground in a nose up attitude landing gear first. Upon impact the gear caught the rocks and the aircraft nosed over. Events became a blur at this point. Next thing I remember was the aircraft rolling again and again. We were both flailing around the cockpit trying our best to brace for each impact. Finally, it stopped. My door was open. We were upside down. I undid my belt and asked Christy if she was okay. I got out and immediately began to try and get her out, afraid that the aircraft was going to continue down the cliffs. We both got out and clear of the aircraft and began to collect ourselves. She had her phone and we began to try to get service to get some help. We got ahold of a coworker who could call for help. We also looked for the dogs and called for her Dog chip. I had seen my dogs below the crash site about 200 feet down. Without being able to find anything I knew we had to begin to get off the mountain. There was no way search and rescue could reach us. We picked our way down the cliffs trying to keep on our feet. We found my two dogs one of which was injured pretty bad. I did my best to keep Christy focused and promised her that I would get her down off the mountain. Freezing cold, stiff legs and a seemingly impossible task ahead of us I knew that we couldn't give up. Five hours of grueling climbing later we found a small road and could hear search and rescue vehicles. A few minutes later we were picked up and transported to where the ambulance was waiting for us. Christy was transported in the ambulance to the EIRMC emergency room in Idaho Falls. I was transported back to the airport where I had a phone conference with the FAA, NTSB, and a local Police deputy. I then borrowed a vehicle and drove to the emergency room to check on Christy. She was released with only minor injuries later that night. This was a tragedy with a string of stupid mistakes leading up to the accident but I feel grateful that Christy was not injured and will be okay. I feel the only thing I can do for now is to try my best to learn from these events and ensure that I never make the same mistakes.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

This accident could have been prevented by not flying when I wasn't properly trained and rated. If I had more experience and training I possibly could have made better judgments to keep the aircraft out of dangerous conditions and downdrafts.
