

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: San Diego/KMYF State: CA

ZIP: 92123 Country: USA

Latitude: 32.82 N Longitude: 117.15 W

(Enter in decimal degrees or degrees minutes seconds)

Accident/Incident Date/Time

Date: 12/13/2020 Local Time: 1250
mm/dd/yyyy

Time Zone: Pacific

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N5098E

Manufacturer: Cessna

Model: 172N

Serial Number: Unknown

Year of Manufacture: 1978

Amateur-Built: ☐ Yes ☒ No If Yes ☐ Kit/Plans ☐ Original Design Make: _____

☒ IFR-Equipped and Certified

☐ Commercial Space Flight

☐ Unmanned Aircraft

Maximum Gross Weight: ~2300 lbs

Weight at Time of Accident/Incident: ~2100 lbs

Number of Seats: 4 Flight Crew Seats: _____

Cabin Crew Seats: _____ Passenger Seats: _____

Number of Engines: 1

Category of Aircraft

- ☒ Airplane
☐ Balloon
☐ Blimp/Dirigible
☐ Glider
☐ Gyroplane
☐ Helicopter
☐ Powered Lift
☐ Rocket
☐ Ultralight
☐ Unknown

Type of Airworthiness Certificate

(Check all that apply)

Standard

- ☒ Normal
☐ Aerobatic
☐ Balloon
☐ Commuter
☐ Transport
☐ Utility

Special

- ☐ Restricted
☐ Limited
☐ Provisional
☐ Special Flight
☐ Experimental
☐ Special Light-Sport
☐ Experimental Light-Sport

☐ Certificate of Authorization or Waiver (COA)
☐ None ☐ Unknown

Landing Gear

(Check all that apply)

☐ Retractable

- ☒ Tricycle ☐ Tailwheel
☐ Amphibian ☐ High Skid
☐ Emergency Float ☐ Skid
☐ Float ☐ Ski
☐ Hull ☐ Ski/Wheel
☐ Other Launch/Recovery System

NOTAMs (D and FDC), AIRMETs, SIGMETs, PIREPs in effect at the time of the accident/incident:

DAMAGE TO AIRCRAFT AND OTHER PROPERTY**Aircraft Damage**

- ☐ None ☒ Substantial
☐ Minor ☐ Destroyed
 ☐ Unknown

Aircraft Fire

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Explosion at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Nose gear and right main collapsed, damage to leading edges of wing, elevator, horizontal and vertical stabilizer, flaps, spinner, wing struts, cowling, windshield

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

My student and I departed KMYF at approximately 1340 LCL with intentions of practicing touch-and-goes at KMYF. I arrived at the airport and watched my student complete the pre-flight, including topping off the fuel and sampling it. Weather was good; calm winds and clear skies. Our taxi and run-up were uneventful with no indications of engine issues. Our first takeoff was also normal. ATC cleared us for the option on runway 28R and the student made a touch-and-go. We began takeoff roll and began our climb out. At approximately 100 feet (it is difficult to recall the exact altitude) in the air the engine became noticeably "quiet," consistent with a sudden decrease in RPMs. I took over controls and ensured the throttle was full and checked mixture was full. Despite this, the aircraft was not producing adequate power; we were losing airspeed and unable to climb. Assuming that I had an engine failure of some sort, I immediately pitched the nose down in an attempt to recapture energy, concerned about stalling. There are few options when it comes to a forced landing off of runway 28L/R at KMYF; immediately west is a very busy highway (163), and west of that is a densely-populated industrial complex, with restaurants, businesses, and some homes. I decided the safest recourse was to continue straight ahead and attempt to land. I did not think we had enough runway remaining to land and come to a stop without overrunning the pavement. We had little runway left, but still I decided that the option most consistent with safety and the situation that I was presented would be to attempt to fly straight ahead and try to land on what little runway was below us. We touched down on the end of 28R. The touch down was hard and, to my recollection, we bounced, and the aircraft then went into the grass west of the runway, and then went through the airport fence bordering Kearny Villa Rd, where the aircraft stopped. I checked to make sure fuel selector was off, mixture idle cutoff, mags/battery/master off. My student and I exited the aircraft through the windows. We were uninjured. I contacted 911 and fire/ambulance/police responded.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I am unsure of what exact mechanical failure occurred. I believe my student and I did due diligence in ensuring the aircraft, as best of our abilities, was airworthy and fit to fly. However, as a professional pilot, I always think back and wonder what I could have done better. Most important is that my student and I, as well as those on the ground, were uninjured. I do wish the forced landing would have left the aircraft in better shape. This was my first experience dealing with an apparent engine malfunction and I would like to stress how quickly everything happened; there was very little time to troubleshoot, as I felt like time was not on our side.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

I believe a mechanical malfunction occurred, but I am not certain if one did, or the exact nature of the failure, if any.

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

It came to my attention after reviewing photos of the aircraft at the accident scene that the right flaps appeared extended. The left-side flaps appeared retracted (in subsequent photos, the left-side flaps were missing from the aircraft; perhaps they were damaged and torn at some point during recovery of the aircraft or when rescue crews came on scene?). In departing from our touch-and-go, it is typical for my students to verbally announce "flaps up, carb heat off" as they perform these respective actions. I recall this to be the case on our departure. My student also believes he raised the flaps as part of our departure.

The dates of inspections of the aircraft and specific W&B information is provided through the flying club's scheduling website. Since the aircraft was damaged, the information has been removed and I am unable to access this and provide it on this form. This information is also included in the aircraft binder, located in the aircraft, which I do not have access to.
