Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft caught fire after impacting the ground. Unsure of damage to aircraft before the fire burnt it all. Minimal property damage. Burned a small area of grass around the aircraft and partially bent a fence post

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I took off from OG31 doing a slight left climbout over the mountains heading towards S01. While cruising straight and level the engine began to sputter and I experienced a loss of power and began descending down to the west towards some farm fields. At an elevation of roughly 50 feet above the ground the engine began to slightly pick back up enough for us to maintain that altitude. I was hesitant to climb out because I did not want another loss in power while climbing causing us to stall. While at that low altitude I hit a cable that I did not see. I lost almost all authority over the controls and began to descend towards the ground. I picked the best place within range to attempt an emergency landing and on the way down clipped a tall fence bordering the field. After impact we were able to get out of the aircraft on our own before it completely burnt.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I am unsure of how this accident could have been prevented. I do however highly recomend 4 point harnesses
