NOTAMs (D and FDC), AIRMETs, SIGMETs, PIREPs in effect at the time of the accident/incident:

DAMAGE TO AIRCRAFT AND OTHER PROPERTY**Aircraft Damage**

None ☒ Substantial
Minor Destroyed
Unknown

Aircraft Fire

☒ None Both Ground and In-Flight
In-Flight Fire at Unknown Time
On-Ground Unknown

Aircraft Explosion

☒ None Both Ground and In-Flight
In-Flight Explosion at Unknown Time
On-Ground Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

No damage to other property. Aircraft sustained substantial damage to propeller, fuselage, both wings, empanage, and landing gear.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

At 10:30 MST my wife and I planned a short scenic flight. After preflighting the airplane I checked local weather: clear, variable winds out of the West at 10kts or less. With myself, my wife and 25 gals of 100LL fuel I was well within weight and balance for the aircraft.

My off-airport desert gravel runway is North/South direction, 700' long and dry. For optimal emergency options I chose takeoff to the South. Run up and departure was normal lifted off fine but suddenly began to drift East and airplane wouldn't climb out of ground effect, consistent with wind shear.

Despite all efforts I was unable to avoid striking a tall Saguaro cactus to the East, clipping the top 8" with the outermost 6" of the left wing tip, which spun us around where we ended right side up facing North in a ditch. We exited the plane unaided; neither wife nor self sustained any injuries. Plane received substantial damage to propeller, fuselage, wings, empanage and landing gear.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

My desert landing strip is in a valley between two mountain ranges.
Variable winds and gusts can be unpredictable and I should have given more attention
to the possibility of how that can factor in to the length and condition of a runway.
I should have delayed this flight to a calmer wind day.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? Yes ☐ No ☒
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

When i signed up for AOPA medical self-assessment, i must have entered the incorrect cert. [REDACTED]. The correct cert. [REDACTED]. (on my cert. card the 8 and 9 are hard to see). I contacted AOPA and explained what i did, they suggested i retake the course and enter the correct number, which i will do. I Just wanted to explain this before hand.

I HEREBY CERTIFY THAT THE ABOVE INFORMATION IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE
