Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

HELICOPTER WAS DESTROYED DURING THE IMPACT SEQUENCE

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

At approximately 7:30 AM on March 16th, 2021, Myself and my passenger departed from a desert campsite on Soggy Lake (dry) with the intention of photographing the area and vehicles. The winds were out of the Southwest at 12-15 knots. During the first run, I was flying to the Southeast and I believed I was compensating for the tailwind condition by flying at approximately 40-45 knots and approximately 300' AGL. The passenger was in the left rear seat and indicated that our track for his filming was good and steady. As I continued Southeast the nose of the aircraft started to yaw to the right, at which time I applied full left peddle. The rotation continued and sped up as I attempted to climb away from the ground. At this time the loss of control was such that I attempted to fly through the rotation. As I neared the ground I flared the helicopter as best I could. The tail struck the ground prior to me being able to level helicopter. The tail strike was followed by the main skidgear (landing gear) contacting the desert floor very hard. The helicopter came to rest on its right side at which time I secured the helicopter. My passenger and I exited the aircraft. There was no fire. My passenger and I were transported to the hospital by personal vehicle for evaluation.

The NTSB, FAA and San Bernardino County Sheriff were notified immediately
