Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Prop strike , broken composit prop , nosewheel gear bent , lift struts and wings bent , vert stab bent ,

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

On 03/17/2021 I departed KRPX , Roundup Montana Muni at 9:20 am with full (20gal) fuel and no passanger for a 20 min flight to a private dirt airstrip 28 miles to the south. I conducted 6 stop and go landings on the private strip (16/34) on rw 16 then went for a local area pleasure flight .

At approx 11:55 am I set up an approach for my seventh landing on rw 16 which has high terrain and scattered trees on the final approach to rw 16 . On short final my sink rate was too rapid and before the flair to landing I increased power to slow my rate of decent .I flaired and the mains contacted the runway with the nose wheel held high . I bounced nose high and slow . To prevent a stall i opened the throttle to full power and pushed the nose over . I mis judged the height of my bounce and when i pushed the nose over to prevent a stall , the nose wheel contacted the runway , the propeller struck the ground and turned me up and onto the outboard end of my R wing cartwheeling me over onto the L wing and then flipped onto the top or back of the airplane coming to rest .

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I should have been better aware of my height (low) above the runway after the aircraft bounced on its main gear.
