Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Cabin door separated from fuselage resulting in rapid decompression. Cabin door struck vertical and horizontal stabilizer on left side of aircraft while departing. Some minor fiberglass damage to door frame, scrapes to vertical stabilizer, impact damage to horizontal stabilizer that penetrated the outer upper skin.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I filed an IFR flight plan from KFFZ to KOKB on 3/18/2021. I departed KFFZ at 14:14 local time. I was cleared to FL240 and was cleared direct BXK then AF at approximately 14:24 lcl. I passed through FL 22.5 when the event occurred. At approximately 30 miles from BXK, the cabin door departed from the aircraft and struck horizontal/vertical stabilizer.

I immediately pulled power, initiated an emergency decent profile and contacted ABQ Center to declare an emergency. I was close to Buckeye airport and selected that location as my landing site. I was switched to Phx Approach where they asked me if I needed any assistance. Since the aircraft was still under power, stable and had no adverse flying characteristics, I responded no and that I had the field in sight. I canceled IFR and switched to KBXK and squawked VFR.

I landed uneventfully on RW 17 and taxied and parked the aircraft. Personnel on the ground had been contacted by ATC and confirmed that we had landed safely.

My Iphone was in my hand during the event and it departed the interior of the aircraft with the door and remained operating after the fall. The approximate location of the phone and the door are known and in the Estrella Mountain Preserve at least 8 miles from any civilization. I have also downloaded the flight profile from the air data card on the Garmin G900 and can confirm that the door separated over the west foothills of the Estrella mountains. The search for the door is continuing.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Locate cabin door and inspect for cause of cabin door separation. Replace door and repair vertical/horizontal stabilizer and test.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

At this time, it is uncertain if the event occurred due to mechanical failure or the inadvertent movement of the cabin door latch. Cabin door has not been located.
