Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

RECOMMENDATION (How could this accident/incident have been prevented?)**Operator/Owner Safety Recommendation**

I was able to debrief with my ground instructor, we determined that there were multiple mistakes that preceeded the accident.

1. As PIC I should not have landed with a tail wind just because that was what the other pilots in the traffic pattern were doing. I will never land with a tail wind unless it is a true emergency.
2. I missed my best opportunity for a go around when I made a hard side load landing on the left main. By the time the right wheel came down we were off the runway. I will initiate a go around with out hesitation in the event a have such another uncoordinated landing in the future
3. The performance of the plane was affected by density altitude, and a tail wind, we also lost speed after initail contact and lost more air speed the breif moment we were in the grass. I will consider density altitude and how it may affect a go around in the future.
