Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Front nose wheel broken, propeller broken, front wind shield broken, top of plan broken(plexi glass so easily broken but no direct impact), wing tips touched the ground so slight damage.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Came downwind to land on 22R with left pattern approach as instructed by tower with ATIS weather info. Tower warned me of wind and gusts. I told them I will be careful.

Had to land in crab angle and straightened plane out before landing. Was a perfect touch down despite wind and as nose wheel started to come down a very strong gust came which took plane off of the runway and pushed it to the edge. I had tried to give gas for go around but speed was not enough as speed was too low. Plane touched down left grass field of runway and nosewheel broke off. Causing propeller strike. Plane then turned left and right wing tip touched ground then the left wing tip touched the ground.

I was not hurt, got out of the plane and waited for airport personnel to come. Airport personnel and I took photos and video. Spoke to FAA official on phone, spoke to NTSB official on phone. Personnel filled out reports. I and another gentlemen pickup the plane and rolled it onto the runway so a tow truck can tow it to my tie down spot at mather Aviation.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

There is always direct crosswind at this airport. The airport is huge, consider a small runway facing 300 to allow smaller aircrafts to land safely into the wind. This is badly needed. only build something about 50 feet wide and 1500 feet long.

NTSB official I spoke to on the 11th also said that this is the only airport that does not have an north/south runway in Sacramento and wind is often in this direction.
