Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damage to right wing and flaperon, Damage to prop. Landing gear sheared off

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

We departed from Logan airport and had intentions to land in a pasture at a friends house in Richmond, Utah. We flew low over his pasture to have a visual look at the landing sight and then was climbing to circle around to make the landing. He lived on a mountain bench so the terrain was rising and we did not clear the top guy wire on the power lines which were approx. 50-60 tall. We were just about 1 ft. too low to clear them and our landing gear caught the top wire. It sheared the main landing gear off and we landed vertically in a mulberry bush which broke our fall. I immediately turned off the power and fuel and exited the plane.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I should have been more aware of surroundings and rising terrain.
