**Description of Damage to Aircraft and Other Property** *(Use additional sheet if necessary)*

damage to the aircraft is minimal, if it has a blow to the right wingtip and on the propeller.

**NARRATIVE HISTORY OF FLIGHT** *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I left on May 21 from Tucson to Phoenix after having left a passenger in Tucson and after relaxing for a while in million air we continued towards our destination, we got on the plane, the plane turned on all normal, listen to the ATIS and then continue to Request my vfr flight clearance I waited for 15 min to be given it there was a lot of traffic that day in Tucson, after I was authorized we flew to Phoenix on the route everything was normal, a little turbulence but light, something normal due to the heat. It was a flight of almost 1 hour. Finally, we were authorized to land on runway 25L. The controller told me to be careful with the turbulence of the plane that had just landed. continue with the approach all normal and calm the wind had it oriented from 240 with 14 We continue with the approach, then I landed on runway 25L, the truth was a very soft landing, after a few seconds and when I was taxiing on the runway, I feel like the plane wants to get up from the left side I try to control but what raised us It was a very strong battle to control it at that time the right wingtip hit the ground then I controlled it because I felt that the plane was going to turn around but it did not. the plane ended up coming to a stop almost going out onto a taxiway. then came the paramedics firefighters and various authorities. Lorne and I got off the plane earlier and we were both fine. After a few minutes and the emotion of the moment would subside, I started to get scared and the paramedics helped me, they checked me and everything went very well, they asked me questions and in the end they made me sign that I was fine. Then they took us to CUTTER AVIATION where I spoke on the phone with some very kind people. I tried to tell them what had happened but at the moment I couldn't think about many things at that time. After everything that happened and already being in bed I started to think about what could have happened. The crosswind was not of that I am sure since in Tucson there was much more crosswind than in Phoenix that day apart in Phoenix there was no crosswind. Then I thought about the plane that landed in front of me, I wondered if the turbulence that I left on the runway could be so strong that the plane got me out of control. Then I listen to the frequencies and hear that WINDSHEARE had been reported 10-15min before I landed. and that other planes had reported and go around and the tower told them about the presence of WINDSHEARE to the largest planes but I was not reported when I was authorized to land. I was only reported to be careful with the turbulence of the plane that had landed before me.

**RECOMMENDATION (How could this accident/incident have been prevented?)**

Operator/Owner Safety Recommendation

It is difficult to know how I could have prevented this incident since it was something natural and nature is unpredictable.
