☐ Fire at Unknown Time
☐ Unknown

Aircraft Explosion

- ☒ None
☐ In-Flight
☐ On-Ground
☐ Both Ground and In-Flight
☐ Explosion at Unknown Time
☐ Unknown

Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

impacted vegetation. Left main gear off. Wings ^{and} cowl damaged.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

TAKEOFF about 7:20 AM from Sutter Co Airport after fueling and calling ATC for flt following to Reno. Weather looked calm + CAVE. I telephoned MYV AWOS + RENO AWOS and confirmed excellent VFR weather and light winds.

Began clb as we left the pattern. Climbed at 80 MPH full power until about 30 minutes into the flight I noticed the oil temp was high, on red line. I lowered the nose and reduced power for cooling. In about 10 minutes, the oil temp came down off red line and I resumed climb, watching to keep temp below red line. As we reached 8,500 ft MSL the engine suddenly lost power and made a noise like a backfire. I lowered the nose to maintain 80 MPH and work carb heat, mixture, mag, and primed to try to regain power. Jerry and I were looking for a spot to land. Oakland center reported Blue Canyon airport 12 miles south of our position. I told them I could not get there.

We spotted a fair sized area of low vegetation that we could glide to and made the decision to go there because we could get on and stopped less violently than the tall steep alternative. As we got to the site the wing touched a small tree and swung us around so that we were facing away from our direction of flight when we stopped.

I called 911 and reported the accident before I got out of the plane. I did hear our ELT on the radio.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Only fly over flat smooth areas or don't let the engine fail.
(feels joke)

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Engine lost power. Carb heat, adjust mixture, throttle,
mag check, pump primer no improvement
