Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Left outboard wing bent up, left elevator bent down outboard of horizontal stabilizer, left landing gear bent under fuselage, propeller tips bent forward.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed MYL at 10:05 AM for flight to Garden Valley U88, climb to 7500 ft. Over Cascade did not like the visibility to the south and decided to land at Cascade, U70, announced intentions on 122.9 to land at U70. started decent to 5800 ft, announced entering up wind at Cascade altitude 5800 ft, announced cross wind at mid field, right hand pattern. Announced downwind, base and final legs. 20 deg flaps on base, turned final runway 30, went to 40 deg flaps, 65 mph, touched down at 60-65 mph, no bounce going straight for 100 ft before plane started going left and could not correct enough, added power for a go-around at same time as plane departed runway. Corrective measures failed to maintain directional control. Plane turned hard to the right and skidded to a stop in the dirt next to runway.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

With only 10 hrs in aircraft since restoration and 12 solo landings at MYL more time with instructor at different airports in my Pacer should have been taken. Have been into Cascade and other area airports in Cessna 172 and 182 aircraft and my confidence was higher than my intentions. As it stands it will probably be some time before I'm flying a tailwheel aircraft again and more training will be taken.
