Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Right Wing Tip & Right Landing Gear Separated, Horizontal Stabilizer Damaged, Right Flap & Ailerons Damaged, Right Fuel Tank Ruptured, Prop Strike, Lower Cowl & Fuselage Damaged.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

About 45 minutes into my flight from KHRI to S48 at 7,500 msl, my aircraft engine experienced a sudden and what appeared to be total power loss leaving the prop windmilling.

The engine did not cough or sputter. The fuel gages indicated approximately 1/4 tank in both left and right tanks.

Attempts to restart the engine were made but were unsuccessful. I trimmed for best glide speed and turned toward nearest airport on my VFR chart 0OR9 Hanel Field.

Upon arrival at 0OR9 I found the airport to be unsuitable for landing due to a large barn constructed at approach end of the runway and multiple vehicles parked on pavement of the former runway. Houses and trees were also obstructing the runway sides.

Subsequently, I made a forced landing in a clearing adjacent to former runway. Both aircraft occupants egressed safely and noticed that fuel was leaking from the airplane's left-wing root and right-wing fuel cap.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Unknown Sudden Power Loss.

00R9 Hanel Field should not be on sectional chart as an active airport for emergency landing.

This is not a functional airport, with large horse barn obstructing 34 runway, multiple crossing pavement driveways confusing where a runway used to be. Both small and large trees obstructing sides, house at end of 16 runway, vehicles and equipment parked on former pavement of runway. No windsock or wind indicator.

If 00R9 Hanel Field a defunct airstrip was not on the sectional, it would not have been the emergency destination. There were many alternate fields to land in that were available on the flight path to and past in close proximity to airport. However, landing at an airport would be the preferred choice if it could be made, with typically less obstructions and wires to be concerned about.
