Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft: the right rear horizontal stabilizer and aft fuselage was crushed and bent.

Boat: unknown

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

On July 20, 2021, I was the pilot-in-command of N46287, a Cessna 172 equipped with floats, operating from the Wiley Post Seaplane Base, W36, in Renton Washington. I was seated in the right front seat of the aircraft, providing instruction to a pilot that was seeking his single engine seaplane rating.

We launched from the dock at W36, and after performing a runup and taxi, we were positioned to make a takeoff to the north on Lake Washington. I informed the Renton Airport's air traffic control tower that we intended to depart to the north. At the time I instructed the student to begin his takeoff run to the north, there was a jet boat approximately 1000 feet off to our right, operating on a roughly northerly heading, but with a course that was diverging from our planned takeoff run. During the takeoff run, the boat abruptly altered course towards our takeoff path. I would estimate that the boat was traveling at more than 50 mph. I instructed the student pilot to turn to the left, but due to the limits of our maneuverability, and the fact that the boat continued to veer into our path, I determined that the boat would strike us. I pulled the throttle to idle in an attempt to avoid the boat, however, the boat continued to head straight towards us. Just prior to impact I observed that the operator was turned completely towards the rear of the boat.

The boat struck the aircraft on the right side horizontal stabilizer damaging both the rear stabilizer and the aft fuselage. There were no injuries aboard either our aircraft or to the boat occupants.
