Mr Dickerson

While conducting primary flight training in N53350 with Ms. Kristi Weber we were instructed to taxi from A11 via A to D taxiway to Tucson Jet Center. While preceding down Alpha taxiway I requested and was granted a right turn to the inner ramp to avoid jet blast from SWA flight 1101. After clearing his blast area and rejoining taxiway A the pilot of the 737 powered up to take runway 11L . As he turned the corner he kept a very high level of thrust and blew us on the nose and right wingtip striking the propeller and damaging the right wing. I radioed ground and informed them of the problem and requested assistance.

Thanks you

Mike Garcia
