

Joshua Cawthra
Senior Aviation Accident Investigator
Office of Aviation Safety - Western Pacific Region

Date: July 27, 2023

Subject: WPR22FA068 - EGPWS and N1 DEECs Examination

The MK-VII Enhanced Ground Proximity Warning System (EGPWS) was examined at the Honeywell Aerospace facility in Phoenix, Arizona on July 25, 2023. The download of data from the EGPWS was not successfully completed due to the thermal damage to the unit.

The two N1 Digital Electronic Engine Controls (N1 DEECs) was examined at the Honeywell Aerospace facility in Tucson, Arizona on July 18, 2023. The download of the incident recorder data and fault history data from both N1 DEECs was not successfully completed due to the thermal damage to the NVM chips.
