Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Much of the damage to the engine was caused by its subsequent forced operation and windmilling propeller, and the plane was damaged by the forced landing off airport. The front and left landing gear collapsed at touchdown and the propeller broke off, the plane skidded along the road without impacting anything on the ground, it came to rest off the left side of the road.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

N7220B was refueled in KPRB for its return flight to KDVO departing at 1829 PDT. The engine lost oil pressure and the manifold pressure dropped to 22" passing PXN VOR at 10,000, and I immediately diverted to KLSN for an emergency landing. Initially in the descent to KLSN the engine was producing partial power but it quickly decayed to a complete failure with serious vibration, the cockpit filled with smoke and there were fire and sparks coming through the hinges of the cowl. I expedited down assuming engine fire and landed on a road that was at the approach end of runway 32 at KLSN.
