Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

No injuries.
 No property damage.
 Aircraft damage: (L) wing tip and trailing edge near
 flaps; fairings (nose + (L) side);
 propeller strike on ground.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On training flight 2 student Mike Monroe,
 student now in final stages of TPL training and
 being needed for checkride.
 Good VFR conditions, relatively cool temp,
 light winds and good visibility >10 SM prevailed
 on flight from home base KOEW to 695.
 Weather info obtained from windsock, and earlier
 from Colville Airport AWOS and call to ground
 observer (CWS Customs). However field is short (~1975')
 and tall trees o/b both ends. After 2 go rounds
 to RW 35 with myself as manipulator of controls,
 I allowed Mike to try ^(while retaining PIC) Despite excellent alignment
 and airspeed control plus full flaps after clearing
 obstructions off threshold RW 35, landing was
 long and ran o/b RW about 100' into stopway,
 and emergency braking plus soft earth led to both
 prop and wing strikes.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

- ① Not allowing the 3rd attempt to land (best)
- ② Doing a go around earlier, as had been done for the first 2 attempts, ^{or prior to reaching 1/2 way point of runway}
- ③ Possibility existed that wind had shifted to the south by time of last attempt but may not have assessed wind sock for 3rd attempt.
