

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: WILTON State: CA
 ZIP: 95693 Country: USA
 Latitude: _____ Longitude: _____
(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 10/14/2021 Local Time: 4:15 p.m.
mm/dd/yyyy
 Time Zone: PT

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N857PF

Manufacturer: WSK-MIELEC

Model: AN-2

Serial Number: 1G10857

Year of Manufacture: 1969

Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Kit/Plans ☐ Original Design Make: _____

☐ IFR-Equipped and Certified
☐ Commercial Space Flight
☐ Unmanned Aircraft

Maximum Gross Weight: approx. 12,000 lbs

Weight at Time of Accident/Incident: approx. 10,500 lbs

Number of Seats: 10 Flight Crew Seats: 2

Cabin Crew Seats: 0 Passenger Seats: 8

Number of Engines: _____

Category of Aircraft

- ☒ Airplane
- ☐ Balloon
- ☐ Blimp/Dirigible
- ☐ Glider
- ☐ Gyroplane
- ☐ Helicopter
- ☐ Powered Lift
- ☐ Rocket
- ☐ Ultralight
- ☐ Unknown

Type of Airworthiness Certificate

(Check all that apply)

- | Standard | Special |
|---|---|
| ☐ Normal | ☐ Restricted |
| ☐ Aerobatic | ☐ Limited |
| ☐ Balloon | ☐ Provisional |
| ☐ Commuter | ☐ Special Flight |
| ☐ Transport | ☒ Experimental |
| ☐ Utility | ☐ Special Light-Sport |
| | ☐ Experimental Light-Sport |
| ☐ Certificate of Authorization or Waiver (COA) | |
| ☐ None ☐ Unknown | |

Landing Gear

(Check all that apply)

- ☐ Retractable
- ☐ Tricycle ☒ Tailwheel
- ☐ Amphibian ☐ High Skid
- ☐ Emergency Float ☐ Skid
- ☐ Float ☐ Ski
- ☐ Hull ☐ Ski/Wheel
- ☐ Other Launch/Recovery System
- ☐ None ☐ Unknown

Engine Type *(Select one)*

- | | |
|--|-------------------------------------|
| ☒ Reciprocating | ☐ Liquid Rocket |
| ☐ Turbo Shaft | ☐ Solid Rocket |
| ☐ Turbo Prop | ☐ Hybrid Rocket |
| ☐ Turbo Jet | ☐ None |
| ☐ Turbo Fan | ☐ Unknown |
| ☐ Electric | |

Fuel System Type *(Reciprocating)*

- ☒ Carburetor ☐ Fuel-Injected

Engine	Engine Manufacturer	Engine Model/Series	Manufacturer's Serial Number	Date of Mfg. <i>mm/dd/yyyy</i>	Rated Power ☒ Horsepower or ☐ lbs of Thrust	Total Time (hours)	Time Since: Inspection (hours)	Overhaul (hours)

Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Aircraft was destroyed by post crash fire. Damage to other property would include a fence and some trees due to fire.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Loaded the aircraft on private taxiway to house. Double checked paperwork, route and info for Fly-in. Finished all W&B loading and securing of load around 3:00 p.m. Conducted passenger, ground support and WX briefings. Topped oil hopper off with oil and asked my nephews to help with window and windscreen cleaning prior to departure. Repositioned aircraft to threshold of RWY 34. Conducted intercom, radio and backup radio checks. After final walk around, myself and one nephew loaded into cockpit for engine startup, aircraft runup and system checks. The aircraft was chocked in-place during checks. This also allowed for brake pressure to reach operating pressure. My brother was assisting as ground crew for confirmation of control checks and passenger loading. Flaps were set to 15°, my wife and younger nephew were assisted into the aircraft by my brother. Through use of hand signals, chocks were removed and placed inside of aircraft. I checked with everyone to make sure they were buckled in and ready for takeoff. Gave hand signal to my brother for takeoff around 4:15 p.m.

On initial forward movement I was aligning tailwheel to lock position. Brought throttle forward to take off power, tail lifted and roll was going as it should. The aircraft lifted off and was climbing normally. On the climb the nose started to pitch up but I could not correct it with forward yoke because I could not get the yoke to move any further forward than about mid position. Knowing we were in real trouble I pushed the throttle to the max, pushing forward on the yoke as hard as I could. It just felt like I was trying to stretch cables, the aircraft climbed nose up very abruptly. I added full right rudder and full right aileron to prevent an early left torque turn. At the peak of the climb I could see a spot to dive into with minimal threat to people/property on ground. At this time I went full left rudder turning the rudder into an elevator, the aircraft now in a dive I tried to adjust flare with throttle. We hit the ground in a three point then bounced up and touched again on the left main and tail wheel. I pulled full brakes causing a left tail loop and backwards crash into trees. The left main collapsed during the tail loop and a tree branch broke the cockpit canopy. I tried to stop the momentum of the loop instinctually with full right rudder. Hitting the tree the rudder pedal broke my right leg. After the left main collapsed the engine and prop struck the ground killing the engine. We came to rest facing 180° opposite our path of landing cradled by a fence and trees. I knew my leg was broken and immediately asked if everyone else was okay. I received quick replies, yes from everyone. We had a brief moment of overwhelming relief but then the fire started. I told everyone seatbelts off and get out now. I propped myself up and realized I could kick out some broken window next to me providing a possible exit. I looked back and seeing my wife and nephew trying to exit the main door. It was already very smokey in the cabin and they yelled, the door is stuck. Apparently the handle was burning his hand with each attempt. I yelled back to them that the way out was going to be through my side of the cockpit but they would have to jump through the fire. I heard my wife say to my nephew, "Let's get to the front." Due to my broken leg I could not get out of the way for a later exit. I looked at my nephew next to me and yelled, get out this way. Propping myself on my left leg, I leaped through the fire collapsing on my back due to the broken leg. I tried to get up again but collapsed again on my back. I heard my nephew nearby and began to crawl on my back looking to see my wife exit but get snagged by something. This caused her to slide face down and catch herself on the ground with her right hand. She then crawled out of the fire as fast as she could. Crawling on my back I noticed my other nephew jump. After exiting he was tackled by his cousin because his hair was on fire. While crawling on my back someone sprayed me with a fire extinguisher. I could hear my wife telling me everyone was out. I could see the fire getting bigger and was drug back further by my father-in-law and neighbor. It was not possible for my wife or nephew to navigate the narrow exit path with the dog. Unfortunately he did not survive the fire. Soon the medavac arrived after EMTS removed my boots and pants.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Failure of forward and possibly aft elevator control on initial climb out.
