To Whom it Concerns,

My 1980 Centurion P210 was in for its annual with Twin Oaks Aircraft Maintenance and I picked it up Thursday December 9th at 7S3.

I was the only person in the aircraft but my dog accompanied me. I did a full run up and check. Everything looked good and nothing was abnormal. I did a weather brief from KHIO and it was "Charlie" with good conditions. I waited for 2 aircraft to land and then I departed Runway 20 at 3:40. I made a left turn out and then entered the left downwind for RW 20. I made my last call to Twin oaks Traffic and switched to the Hillsboro (KHIO) tower frequency and reported my position as I attempted to climb to traffic pattern altitude. I was struggling to make it to 1200 feet so I checked my settings to make sure I didn't have a setting incorrect but I did not notice anything wrong. After reaching 1100 feet I started losing altitude. I called KHIO Tower and notified them that I was unable to maintain altitude and was having engine difficulties. They cleared me straight in to 31 Left. I looked ahead and saw a sea of houses ahead of me and fields behind me and was unsure with being able to reach 31L at my current decent rate. At 3:42 I made a left turn back to Twin Oaks and reported my decision to the KHIO Tower. I also notified them that I was changing to the Twin Oaks frequency. I checked my settings several more times to make sure something wasn't set right, but it all seemed ok. Then three of the 6 cylinders EGT spiked in the red and were indicating overheating. I adjusted the mixture to try to cool the cylinders but there was no change. I picked a filbert orchard field straight ahead and landed in between the trees. It was a young orchard so the trees were only about 12 feet tall and the main branches were fairly small. At 3:45 I made a smooth landing and no injuries to myself or my dog. The plane remained upright. I stayed fairly centered down the row until the end as it slid in the mud and the prop hit a tree in one of the rows. I radioed that I was on the ground safely and shut off the plane. There was a little smoke coming from the engine compartment. From where I turned back to 7S3 it was 3.6 miles to the KHIO 31L runway and I only traveled 3.37 miles towards 7S3. It is likely that I would not have made it.
