Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The mishap pilot and another Commercial Pilot (Patrick O'Conner) had departed Auburn approximately 12:15pm in the mishap aircraft (N6280F). They were going to Placerville airport to retrieve another CE-172 (N7954G) that had been left the day before due to in-climate weather.

Upon arriving at Placerville, Mr. O'Conner exited 80F and proceeded to complete a pre-flight, start, and taxi in 54G. The mishap pilot remained in 80F throughout this time waiting for 54G (to ensure 54G was 'good to go').

Mr. O'Conner departed in 54G, obtained an IFR clearance, flew the RNAV 07 into KAUN. He broke out of the weather and picked up the runway approximately 100' above minimums and landed without incident. He then noted the weather was decaying and expected to hear 80F perform a missed approach (or, at the time, suspected the mishap pilot may have diverted back to Placerville). He never heard from 80F until notification that there had been an accident.

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

Based on the Company ORM sheet for training (see attached) , given what we know and think we know of all conditions affecting the flight, it appears the mishap pilot would have fallen into the 'Normal' risk category requiring no additional supervision.
