Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Helicopter was totalled. The tail was broken or cut off. Rotor blades were mangled. One skid ripped off. Front plastic was broken.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Helicopter Accident 3-22-2022

My wife Stacy and I left our ranch [REDACTED] Grace Idaho 83241 around 8:30am. Prior to the departure I completed an inspection of the aircraft. Everything checked out. The flight to Rexburg was without event. No ceiling that I remember, and winds were pretty much calm.

We landed in Rexburg at the airport around 9:20am. We fueled up and I completed an aircraft check. Zach Hillman our friend in Rexburg joined us in the helicopter. We had flown to Rexburg several times exploring different areas. In the past we had flown North and Northeast of the Rexburg area. This day we wanted to explore Northwest of the Rexburg area which put us in the valley of the accident (44.16539, -113.0183). I (Nathan Hale) was in right seat as pilot. Stacy and Zach were passengers. Stacy in front left seat and Zach was in the left back seat.

When we entered the valley, I noticed right away the mountains were a lot taller and the foothills we were flying over had us at or around 7500 to 8000 feet. As I recall the sky ' was pretty much clear...not much wind...it was beautiful. We hadn ' t gone into the valley very far when I had to use the restroom. I circled around a ridge several times and landed. It was roughly 7200 feet. Prior to landing I hovered to make sure I had enough power to lift off. Everything seemed fine so we landed. After using the bathroom, I lifted off with plenty of power and proceeded up the valley.

As I passed several big canyons off our right side, I noticed pretty good winds gusting from the canyon openings. After passing several of these I decided it was time to turn around and head back out of the valley. We crossed from the right side of the valley over to the left side and began flying out of the valley.

As we were flying out, I had to use the restroom again. I picked a ridge in front of me (coordinates above) and circled to check my landing spot. When I came into land, I was to the best of my knowledge around 7500 feet. I pulled power to establish a hover to verify I had enough power to take off if I landed. We had power so I began to land. As I recall it was around 11am.

To the best of my recollection while landing, I felt a big push downward from behind. While descending the low rotor rpm light and horn went off. The helicopter became sluggish, so I tried every technique I knew to reestablish power. Nothing worked and nothing I did stopped the downward momentum. It was pushing us down and over the edge of the ridge. I felt if I didn ' t stop the forward movement and we continued over the ridge we would die. I lowered the helicopter to the ground and felt momentum taking us over the ridge further, so I pulled cyclic to the right to tip the helicopter over and stop it.

After clearing ourselves from the helicopter I walked to the top of the ridge and called 911. After being passed around to several counties they finally began sending help. It took them several hours to get to us. Seemed like around 1pm or shortly after that they drove us off the mountain.
