NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Nicholas Sol and myself, Nikolaus Van, headed out on a checkride preparation flight in N822SA from KLGB approximately 14:00 local. He is working to add a multiengine to his existing private pilot instrument. Upon completion of the flight which included a practice ILS approach to a full stop landing on runway 30, we taxied over to runway 26L for a lap in the pattern. Takeoff went as planned and it was time for a short field landing. The approach was normal and the gear was checked twice by the student and thrice by myself. The gear appeared to be in the down and locked position as indicated by three green lights. The student touched down at approximately 15:40 local with no sideloading on last part of the 1000 foot markers. Shortly after touchdown (250 yards after reviewing the landing site) the aircraft began to sharply yaw towards the right. The student exclaimed "your flight controls" to which I responded with "my flight controls" and promptly applied full left rudder and left aileron in an attempt to maintain runway centerline. The right wing and props struck the ground and we came to a stop just off the runway in the dirt right of centerline. I called tower and informed them of the gear collapse and prop strike. I also told them everyone was okay and requested they send everyone. We also shut down the engines, fuel to the engines, all electrical equipment and evacuated the aircraft.
