Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Prop strike, wing struts bent, radio antennas destroyed, vertical stabilizer and rudder top 1/4 crushed, empennage bent, vertical stabilizer separating from forward attachment, wingtips damaged, battery case damaged, oil staining in cockpit, scratches on runway surface and oil/fuel spill.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Started aircraft up at Signature Flight Support at KLAS and obtained weather. ATIS Echo reported winds 180 at 15 Gust 26. Obtained VFR clearance and squawk from KLAS clearance. Called for taxi and instructed to "Taxi 19R via Hotel" from Signature. Approaching 19R, switched to Tower frequency. Tower instructed "Cross 19R approach, hold short 19L". Read back clearance, crossed 19R approach and held short of 19L on 19L Hold Pad. American Airlines Heavy departed 19L. Tower instructed "182HH, line up and wait 19L". Read back instruction and began to taxi. Upon entering runway surface, the right wing of aircraft began to lift from violent burst of wind or possible jet wash, despite full crosswind correction inputs on flight controls. Attempted to stop aircraft, but it tipped on to nose and resulted in a prop strike. Aircraft continued to tip over nose and landed upside down at departure end of runway 19L. Pilot and passenger evacuated aircraft without injury. Operations vehicles, KLAS ARFF, Clark County Police responded to scene. No fire or explosion resulted from aircraft incident. Aircraft was craned and towed off runway, and 19L re-opened. Original destination was 1.6 hours away at KCCB (Cable Airport in Upland, CA). Departure time from KLAS was planned for 9:25AM local prior to incident.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Pilot should have questioned/refused tower's instruction to line up on runway following the departure roll of a Heavy American Airlines aircraft. Pilot should have taken more time holding short prior to taxiing even if it would have resulted in Passenger Airlines being delayed while waiting on 18Z HH. Pilot should have questioned tower about possible wake turbulence, as none was stated.
