Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

M/R blades destroyed, T/R blades destroyed - T/R GB separated from from A/c

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I Departed from Alpac Helicopters shop at app. 0600 headed south at 500' AGL - wx clear 5 to 7 mph wind. Approximately 10 to 12 min. into flight felt a vibration for about 7 to 10 seconds before a loud bang followed by a sharp yaw to right. I lowered collective and rolled throttle down to bring A/c back into controlled forward flight. There was only large almond trees beneath me but a 1/2 mile ahead I could see a young orchard. I increased pitch and RPM to stretch the glide to make the field. Once I cleared the big trees I attempted a running landing between the small trees. When the aircraft slowed below 25 mph it started to rotate to the right at about 20' high. When the A/c had rotated 180° I rolled off the throttle and tried to cushion the landing. Upon hitting the ground the A/c tried to still rotate to the right causing it to roll on its left side causing the main rotors to strike the ground. I turned the battery switch off, unbuckled seat belt and exited the A/c.
