Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Rear fuselage skin damaged on lower left side at bulkhead at 133, collided with airport taxi sign.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

My student had completed an uneventful landing and commenced a planned touch and go. He retracted flaps and added full power. As the aircraft accelerated my student pushed the yoke forward to lift the tail of the aircraft. At this point the aircraft yawed rapidly to the left. I took control of the aircraft and added corrective right rudder and cut the power. The aircraft swung rapidly to the right and I countered with left rudder and the aircraft again swung sharply to the left. I again countered with right rudder and as the aircraft responded to the right it overran a taxiway sign and then came to a stop. I advised the tower we were off the runway. There was no immediate response from the tower, so I taxied onto taxiway A. The tower told me at that point to hold my position.
