Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Right wing strut folded from impact with airport runway length sign.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On June 21st 2022 I was training with Kate Gralton in her 7AC tail number N82579. I had been retained to fly with her and help her regain confidence after an absence from flying due to pregnancy. On the day we were flying at S50 (Auburn Municipal Airport) an untowered airport and practicing landings. This was the fourth time we had flown together.

Upon her third landing that day she landed with an airspeed of 40 MPH which is slower than the desired landing speed of 50 MPH but above the stall speed of the airplane which is approximately 35 MPH. Because she is a licensed pilot and flying her own plane, I was using verbal coaching to correct any errors I saw. After landing, the plane swerved to the left. I verbally told her to center it back down the runway. The plane then swerved harder to the left and started a ground loop to the left. We were probably only doing 20-30 MPH at this time. It was too late for me to the controls and make any corrective action.

The plane impacted the 2000 foot runway sign on the right side of the plane. Nobody was injured and the plane was towed back to her hanger. If we had not impacted the sign, we would have likely performed a slow ground loop with no damage incurred. I am working with other CFI wh hav extensiv tailwhee experienc t gai additiona trainin o m timin o whe t tak contro vs verba correction

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Stay longitudinally aligned with runway at all times and make small but precise corrections to any deviations.
