Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Left wheel strut and fuselage at wheel strut attachment. Left wing approximately 4 feet from wing tip. No damage to property.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed UO6 (my home airport) and flew to KAFO. I completed 4 practice landings and then taxied to the ramp for fuel. After fueling, I wanted to practice one more landing before heading home to UO6. It was on this last practice landing that I ground-looped the airplane. Winds were reporting calm but I had noticed on previous landings that there was some variable wind at the south end of runway 34. I also noticed a small variable wind during my last takeoff at the north end of 34. On landing, I initially had a small bounce before setting all three wheels on the ground. The tailwheel was immediately squirrely and I was unable to apply enough rudder to stop the airplane from entering an uncontrolled ground loop. The airplane came to a stop on the taxiway, leaving the runway clear. I shut down the aircraft, turned off the fuel, and exited the aircraft. I immediately called 911. The time of my 911 call was 1200.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I should have anticipated the variable winds upon touchdown. After the first bounce, although relatively small, I should have initiated a go-around.
