NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On July 6th, 2022 approximately 1740 PDT both I and the student MinHong Beak visually inspected the oil at 4.9 quarts and fuel at 9Gal each side, 18Gal total via the dipstick. No abnormalities were observed during the run-up and leaned mixture to peak RPM. Departed approximately 1750 PDT and established ATC contact with Fallon Approach on 120.85

Flew directly to HZN and conducted one practice approach into KFLX. Observed slight back-firing on the engine during power reduction on approach. Followed by a parallel holding entry at HZN. Fallon Approach cleared us for the VFR practice RNAV approach full-stop @ KSPZ and approved the frequency change upon the completion of one lap in the hold over HZN at 8,000ft msl. The student became disoriented over the ZEKEM waypoint and made a hard right turn to correct for the approach course.

I noticed a momentary drop in the RPM and followed by engine back-firing. Soon after, the engine lost power to approximately 1200 RPM. We commenced emergency procedures. (ABC) All engine instruments were in the green, and fuel gauges were reading 1/4th on both tanks, and low vacuum. Engine RPM fluctuated between approximately 1100RPM to 1700RPM. We transmitted PAN PAN PAN over Fallon Approach and notified them of our partial engine failure. Aimed for Highway 50 initially and changed landing spot upon observing incoming traffic around the highway's curve. Commenced a normal soft field in the dirt parallel to the highway. Touched down smoothly and kept the nosewheel off the ground for the initial 200ft of ground roll until impacting a small boulder and broke-off the front nose gear.
