NTSB Accident Number: WPR22LA249
Aircraft Registration & Make/Model: N4383D / PA32R-301T
Accident Location: Red Bluff, CA.
Accident Date: June 19, 2022; 1700 PST
Person Contacted: Pilot: Brian Haugen

In a telephone interview, Mr. Haugen stated that after he recovered the airplane, he had a mechanic go over the airplane. The mechanic discovered that the landing gear motor circuit breaker had popped, which disabled the landing gear from fully extending and lock in the down position and disabled the warning light system. Once the circuit breaker was reset, the landing gear functioned normally.
