Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Substantial damage to aircraft. Came to rest on its side. Blades contacted ground and tail boom was severed.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Training flight originated from KCDC at approximately 0700. Intent of flight was to work on normal and emergency procedures in a practice area approximately 8 miles west of KCDC. The flight progressed to auto rotation training. The incident occurred on the 3rd practice auto rotation. Debrief from both the instructor and student indicated that RPM control was erratic through the entire auto. RPM decayed dramatically around 100 AGL. The instructor was not able to correctly regain the RPM and elected to try and run on the aircraft. The aircraft touched down near the side of the road and slid for 150 ft. The left skid contacted softer dirt which spun the aircraft 180 degrees. The main rotor contacted the tail boom during the rotation severing the empennage. The helicopter came to rest on its left side. the blades contacted the ground, but stayed overall intact. Instructor and student were able to exit the aircraft and contact company dispatch.
