

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: 12nm ne of the Toolik Field Station State: AK

ZIP: _____ Country: US

Latitude: 68.68892N Longitude: 149.09163W

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 08/26/2022 Local Time: 11:30a
mm/dd/yyyy

Time Zone: Alaska

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N240RM

Manufacturer: Robinson

Model: R44 Clipper I

Serial Number: _____

Year of Manufacture: _____

Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Kit/Plans ☐ Original Design Make: _____

☐ IFR-Equipped and Certified

☐ Commercial Space Flight

☐ Unmanned Aircraft

Maximum Gross Weight: 2400 lbs

Weight at Time of Accident/Incident: 2304 lbs

Number of Seats: 4 Flight Crew Seats: 1

Cabin Crew Seats: _____ Passenger Seats: 3

Number of Engines: 1

Category of Aircraft

- ☐ Airplane
- ☐ Balloon
- ☐ Blimp/Dirigible
- ☐ Glider
- ☐ Gyroplane
- ☒ Helicopter
- ☐ Powered Lift
- ☐ Rocket
- ☐ Ultralight
- ☐ Unknown

Type of Airworthiness Certificate

(Check all that apply)

Standard

☒ Normal

☐ Aerobatic

☐ Balloon

☐ Commuter

☐ Transport

☒ Utility

Special

☐ Restricted

☐ Limited

☐ Provisional

☐ Special Flight

☐ Experimental

☐ Special Light-Sport

☐ Experimental Light-Sport

☐ Certificate of Authorization or Waiver (COA)

☐ None

☐ Unknown

Landing Gear

(Check all that apply)

☐ Retractable

☐ Tricycle

☐ Amphibian

☐ Emergency Float

☐ Float

☐ Hull

☐ Other Launch/Recovery System

☐ None

☐ Tailwheel

☐ High Skid

☒ Skid

☐ Ski

☐ Ski/Wheel

☐ None

☐ Unknown

Engine Type (Select one)

☒ Reciprocating

☐ Turbo Shaft

☐ Turbo Prop

☐ Turbo Jet

☐ Turbo Fan

☐ Electric

☐ Liquid Rocket

☐ Solid Rocket

☐ Hybrid Rocket

☐ None

☐ Unknown

Fuel System Type (Reciprocating)

☒ Carburetor

☐ Fuel-Injected

Engine	Engine Manufacturer	Engine Model/Series	Manufacturer's Serial Number	Date of Mfg. mm/dd/yyyy	Rated Power ☒ Horsepower or ☐ lbs of Thrust	Total Time (hours)	Time Since: Inspection (hours)	Overhaul (hours)

Eng. 2								
Eng. 3								
Eng. 4								

Last Inspection Type

☒ 100-Hour ☐ Continuous Airworthiness

☐ AAIP ☐ Conditional Inspection

☐ Annual ☐ Unknown

Date Last Inspection: 08/15/2022
mm/dd/yyyy

Airframe Total Time: _____ hrs

hours measured at (Select one)

☒ Last Inspection ☐ Time of Accident/Incident

Type of Maintenance Program (Select one)

☒ Annual

☐ Conditional (Amateur-built only)

☐ Manufacturer's Inspection Program

☐ Other Approved Inspection Program (AAIP)

☐ Continuous Airworthiness

☐ Other, specify: _____

Description of Fire Extinguishing System

☐ None

☐ Specify: handheld extinguisher

Propeller 1

☐ Fixed Pitch

☐ Controllable Pitch

☐ Ground Adjustable

Manufacturer: _____

Model: _____

Propeller 2

☐ Fixed Pitch

☐ Controllable Pitch

☐ Ground Adjustable

Manufacturer: _____

Model: _____

ELT Installed: ☒ Yes ☐ No

If Yes:

ELT Manufacturer: _____

Model or Part No.: _____

TSO No.: ☐ OC91 (121.5 MHz) ☐ OC91a (121.5 MHz)

☐ OC126 (406 MHz)

Was ELT still mounted in aircraft? ☒ Yes ☐ No

Was ELT still connected to antenna? ☒ Yes ☐ No

Did ELT Activate? ☒ Yes ☐ No

If activated:

Did ELT Aid in Locating Aircraft? ☒ Yes ☐ No

If not activated:

Indicate Reason: ☐ Impact Damage

☐ Fire Damage

☐ Battery Expired/Damaged

☐ Unknown

Additional Equipment (Check all that apply)

☐ ADS-B

☐ Airframe Parachute

☐ Angle of Attack Indicator

☐ Autopilot

☐ Data Recorder

☐ Electronic Flight Bag or Handheld Device

☐ Electronic Multifunction Display

☐ Electronic Primary Flight Display

☒ Handheld GPS

☐ Heads Up Display

☐ Onboard Weather

☐ Satellite Tracking Device

☐ Stall Warning System

☐ Video Recording Device

☒ Other, Specify: handheld ADS-B

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Rotor blades folded in half, mast sheared, vertical stabilizer bent, windscreen broken - typical damage from a dynamic rollover

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

BACKGROUND: The date of the event started like any other: I slept 7 hours, went to breakfast, got coffee and headed to safety briefing at 8:30. Went over the day's mission at the helo coordinator's office. We had a conference call with our DO to go over flight plan, weight and balance and weather. I was able to take max fuel with the passengers and gear - and still remain 50 lbs under max gross weight. Went to the pad to preflight and fuel. The first mission of the day was to go to 20 different sites to collect water samples.

WEATHER: Weather reporting apps forecasted winds about 20 knots from 180 degrees, gusting to 30. The entire first mission was uneventful, as the wind was consistent in terms of speed and direction. I did not have to make guesses on where the wind was coming from. After completing 20 stops from the first group (each stop requiring an approach, landing and take-off into the wind), my two passengers and I headed to the landing spot to pick up group number two.

LOCATION: The event occurred at a familiar location - an area next to Fog Lake, where I was involved in slinging twenty-five, 500lb propane bottles. Our landing area was a side-exit to a construction staging area. I had done a number approaches to this spot to refuel and to secure my long-line. Again, this was a familiar location.

EVENT: Setting up for my approach, I had a strong tailwind. The terrain was hilly and the approach path was over a basin. Turning and descending on left base, we began to drift from the south wind. As I added collective pitch to control descent rate, we began to settle. My normal routine is to turn into the wind, as I have done thousands of times before. At this point, quick decisions had to be made, as we were rapidly descending. Neither a classic nor a Vuichard recovery technique was an option because we were too close to terrain. I didn't want the blades or the tail to make contact with the ground while in flight, so a run-on landing on to the soft tundra was the safest option. This decision had to be made in a half-second. I leveled the ship and performed a run-on landing as softly as I could.

Run-on landings are great on a smooth surface; however, the tussock-filled tundra is very uneven and when making contact with the surface, a dynamic rollover ensued, causing us to roll onto the starboard side of the ship. Once stopped, I asked if everyone was ok. I turned off the battery and helped everyone out of the helicopter. After group hugs, we walked 200 yards uphill to the road.

ANALYSIS: As known, there are no radar weather reporting stations at our location on the North Slope. We rely on external indicators, i.e., leaves on trees, smoke, ripples on water, etc. The only source of local weather forecasting is the Windy app, which uses the Global Forecast System (GFS.) Additionally, the GFS is run by the National Weather Service. The GFS algorithms were predicting 30 knot wind gusts. I had not encountered strong gusts at the previous sampling sites.

The final leg of my flight after my first group and commencing my second group was 4 miles away. This was an off-airport, unimproved landing area in featureless tundra. My 20 previous landing sites were lakeside and you could clearly see the wind direction and intensity. The waypoint referenced as 240RM - see attachment. There were no external indicators that I could reference for wind. With no external references, such as lakes or trees, and with no location-specific forecasting available, I had no way to know if the wind would be different at the landing site. Because there was a nearby mountain range, and I had flown over a basin immediately prior to the landing, mechanical turbulence was likely a factor, as well. I got caught off guard and made a misjudgment on wind. Perhaps I was hit by a low level wind shear?

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

In the final analysis, perhaps I was hit with a 30-knot gust and was anticipating 20 knots from the past hour? If I was tracking 40 over the ground on my downwind leg (my estimation based on thousands and thousands of approaches) with a 30-knot tail wind, then I'd have a 10-knot airspeed - less than ETL. Combine that with a high sink rate and added collective pitch, that is the perfect recipe for Settling With Power. A landing at the Toolik heli pad would have eliminated all doubts on wind, because of the windsock.

Here are some suggestions to mitigate risk and improve flight safety at the TFS:

1. A temporary and portable windsock can be used at sites where there is going to be regular use.
2. A portable anemometer would be a great resource for flight ops at the Toolik field station.

Although not related to this particular event, there are other safety concerns.

3. A dedicated and published frequency for the TFS should exist.

The CTAF for nearby Galbraith Lake is 122.8. There are people who use this freq as a call-in line to report local fishing conditions. When more than one helicopter is operating at Toolik, which is often the case, and 122.8 gets congested from chatter, safe traffic separation can be challenging. This particular scenario actually happened - two ships were landing at Toolik at the same time and they didn't know each other's location, as the CTAF was being hijacked by conversational chatter. We, the pilots, agreed on 123.45 for an alternative CTAF for Toolik, but this needs to be formally implemented so there are no similar events in the future.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

FUEL & SERVICES INFORMATION**Fuel on Board at Last Takeoff**

(Convert from pounds, as necessary)

21.3 Gallons

Fuel Type

☐ 80/87

☐ 115/145

☐ Jet B

☐ Other, specify _____

☒ 100 Low Lead

☐ Jet A

☐ JP8

☐ 100/130

☐ Jet A-1

☐ Automotive

Other Services, if Any, Prior to Departure**EVACUATION OF AIRCRAFT**

Was an emergency evacuation of the aircraft performed? ☒ Yes ☐ No

Method of Exit - Describe how the occupants exited and how many occupants evacuated each location

The helicopter was on its starboard side. The three of us (two passengers and me) unbuckled and climbed out through the broken windscreen. I assisted Jackson VerSteeg's exit.

OTHER AIRCRAFT - COLLISION (If air or ground collision occurred, complete this section for other aircraft)

Aircraft Registration Number

Manufacturer: _____

Model: _____

Damage to Other Aircraft

☐ Destroyed

☐ Minor

☐ Substantial

☐ None

Registered Owner of Other Aircraft

Name: _____

City: _____

State: _____ ZIP: _____

Country: _____

Pilot of Other Aircraft

Name: _____

City: _____

State: _____ ZIP: _____

Country: _____
