Suzanne Braund ASI NM07 met with FBO manager Mr. Dave Teggins		
at South Valley Regionl Airport (U42)		
SUBJECT		
Video Observation N48918		

DIGEST

On September 12, 2022 I met with Mr. Dave Teggins the FBO manager at the U42 airport to watch video that was captured on September 07, 2022 at 2207Z of N48918. The video shows N48918 on initial climb-out just after rotation. The aircraft appears to be in a normal climb attitude. At approximately 50-100 feet AGL the aircraft can be seen experiencing small abrupt changes in altitude in what appears to be turbulence. The aircraft appears to continue a climb to approximately 200-300 feet AGL. A wall of vertical dust can be seen directly in front of the aircraft's flight path as N48918 continues towards the area of dust it appears to be in a descent. The aircraft is moving forward in a descent towards the vertical dust line and then is no longer able to be seen in the video frame.

CONCLUSION, ACTION TAKEN, OR REQUIRED
