

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: West Jordan State: Utah

ZIP: 84084 Country: USA

Latitude: 111.9923 W Longitude: 40.6213 N

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 09/07/2022 Local Time: About 3:00 pm
mm/dd/yyyy

Time Zone: Mountain

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N48918

Manufacturer: Cessna

Model: C152

Serial Number: 15283389

Year of Manufacture: 1979

Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Kit/Plans ☐ Original Design Make: _____

- ☐ IFR-Equipped and Certified
☐ Commercial Space Flight
☐ Unmanned Aircraft

Maximum Gross Weight: 1670 lbs

Weight at Time of Accident/Incident: 1551 lbs

Number of Seats: 2 Flight Crew Seats: 2

Cabin Crew Seats: 0 Passenger Seats: 0

Number of Engines: 1

Category of Aircraft

- ☒ Airplane
☐ Balloon
☐ Blimp/Dirigible
☐ Glider
☐ Gyroplane
☐ Helicopter
☐ Powered Lift
☐ Rocket
☐ Ultralight
☐ Unknown

Type of Airworthiness Certificate

(Check all that apply)

- | Standard | Special |
|---|---|
| ☒ Normal | ☐ Restricted |
| ☐ Aerobatic | ☐ Limited |
| ☐ Balloon | ☐ Provisional |
| ☐ Commuter | ☐ Special Flight |
| ☐ Transport | ☐ Experimental |
| ☐ Utility | ☐ Special Light-Sport |
| | ☐ Experimental Light-Sport |
| ☐ Certificate of Authorization or Waiver (COA) | |
| ☒ None | ☐ Unknown |

Landing Gear

(Check all that apply)

- ☐ Retractable
- ☒ Tricycle ☐ Tailwheel
- ☐ Amphibian ☐ High Skid
- ☐ Emergency Float ☐ Skid
- ☐ Float ☐ Ski
- ☐ Hull ☐ Ski/Wheel
- ☐ Other Launch/Recovery System
- ☐ None ☐ Unknown

Engine Type (Select one)

- ☒ Reciprocating ☐ Liquid Rocket
☐ Turbo Shaft ☐ Solid Rocket
☐ Turbo Prop ☐ Hybrid Rocket
☐ Turbo Jet ☐ None
☐ Turbo Fan ☐ Unknown
☐ Electric

Fuel System Type (Reciprocating)

- ☐ Carburetor ☐ Fuel-Injected

Airframe Total Time: 4,394.3 hrs

hours measured at (Select one)

- ☐ Last Inspection ☒ Time of Accident/Incident

Type of Maintenance Program (Select one)

- ☒ Annual
☐ Conditional (Amateur-built only)
☐ Manufacturer's Inspection Program
☐ Other Approved Inspection Program (AAIP)
☐ Continuous Airworthiness
☐ Other, specify: _____

Description of Fire Extinguishing System

- ☒ None
☐ Specify: _____

Propeller 1

- ☒ Fixed Pitch
☐ Controllable Pitch
☐ Ground Adjustable

Manufacturer: McCauley

Model: 1A103

Propeller 2

- ☐ Fixed Pitch
☐ Controllable Pitch
☐ Ground Adjustable

Manufacturer: _____

Model: _____

ELT Installed: ☒ Yes ☐ No

If Yes:

ELT Manufacturer: Dorne & Margolin

Model or Part No.: C589511.0117

TSO No.: ☒ C91 (121.5 MHz) ☐ C91a (121.5 MHz)
☐ C126 (406 MHz)

Was ELT still mounted in aircraft? ☒ Yes ☐ No

Was ELT still connected to antenna? ☒ Yes ☐ No

Did ELT Activate? ☐ Yes ☒ No

If activated:

Did ELT Aid in Locating Aircraft? ☐ Yes ☒ No

If not activated:

- Indicate Reason: ☐ Impact Damage
☐ Fire Damage
☐ Battery Expired/Damaged
☒ Unknown

Additional Equipment (Check all that apply)

- ☒ ADS-B
☐ Airframe Parachute
☐ Angle of Attack Indicator
☐ Autopilot

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

The nose strut, Prop, Engine compartment (displaced), back windows and doors were all destroyed from the from the initial impact with the ground, and the right wing and wing strut were damaged pretty bad from impacting the trunk of a tree.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

Our lesson and preflight preparation called for my student (Daniel Kaufman) and I to take-off and depart U42 (South Valley Airport) and fly about 15 SM Northwest in order to practice our emergency procedures (Engine Failure with Forced Landing Procedures and Engine Fire, Cabin Fire, and Wing Fire with Emergency Decent Procedures) over the Great Salt Lake for about an hour and then return back to U42 in order to practice better take-off and landings for the last 30 minutes of the lesson.

At approximately 10 SM from U42 we went through our "In Range Checklist" which consisted of getting our Weather (AWOS), Setting our Altimeter, Aligning our Heading Indicator with our Magnetic Compass, Setting/Verifying our Avionics and Going over our Approach Brief. The AWOS said that the winds were 150 at 6 knots, so our approach brief included setting up on a 45-degree angle for a midfield downwind entry at 5,600 feet (traffic pattern), landing on runway 16. Just before we entered the traffic pattern on a mid-field downwind entry, I checked the AWOS again to verify the winds were still favoring runway 16, and indeed they were. However, the winds were now 160 degrees at 4 knots... even better.

As we descended through the traffic pattern with right turns, I again reminded Daniel that we had planned to work on better takeoffs and landings, therefore, we were going to do a few touch and go's to finish the last 30 minutes of our lessons while staying in the traffic pattern. Needless to say, his landing was very good. As we touched down, we radioed on the CTAF that we were on the go for take-off on runway 16 and that we would be staying in the traffic pattern. Shortly after rotation and at about 100 feet off the ground, I commented to Daniel that he had done a great job on both his landing and his takeoff. I then verified that our oil pressure was good, our climb was at Vy (67 knots), carb heat was in, flaps up and our RPM was where it needed to be.

As we then climbed to about 300 feet, we began to lose lift. It was like a giant vacuum was pulling us down. I again verified our airspeed, checked RPM's and tried to increase our throttle. I then said, "my flight controls," to which Daniel said, "your flight controls." I quickly pushed our fuel mixture to "full rich," checked that we had full throttle still and had Daniel check that our Mags were on both, our Master was on, and that the primer was in and locked. Unfortunately, nothing was working. As we continued to descend, I soon realized that we were in a Microburst. Our 4 knot headwind had gone (what felt like) a major downdraft. I realized that I was too low to turn left or right, and I couldn't stall the airplane so I continued to fight to gain any possible lift that the airplane could muster. Within a few seconds it became apparent that we had to land at the best option, which happened to be a soccer field straight ahead (the same soccer field that we mention in our before takeoff brief... if after rotation we lose engine power, and are out of runway, we will land in the soccer fields straight ahead).

As the soccer field came closer and closer, at about 30 or so feet, I realized that we only had about 300 feet to land the airplane before we would hit a concrete wall, so I cut the engine and fuel and put the airplane nose heavy into the grass and aimed our wings toward the only tree that would save our lives.

As we hit the grass, our doors opened and you could hear and feel the gravity of our situation. I just kept thinking, Daniel isn't dying today, Daniel is not dying.

Withing seconds our Airplane's right wing and wing strut had in fact directly hit the trunk on the tree and spun our airplane 180 degrees around, while saving us about 20 feet from a the concrete wall. I quickly looked at Daniel, and asked if he was ok. He said, "I'm ok." And then asked if I was ok. I then verified that the fuel was in the off position, we unbuckled and exited towards the rear of the airplane.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Trust me... I've racked my soul over this question. It's very easy to question everything that happened. In the end, we hit a 100 to 1 shot that happened to be a microburst on the departure end on the runway. I'm not even sure that flying on the coldest day of the year would have helped our performance in anyway. We ended up being a weather phenomenon that we didn't see coming and couldn't plan for, and our little 152 just didn't have the strength to power us through it.

WEST JORDAN POLICE DEPARTMENT WITNESS STATEMENT

Case # WJ22-45202

NAME Kelly Alfred DATE OF BIRTH [REDACTED] AGE 50
DRIVER LICENSE OR I.D. # [REDACTED] DRIVER LICENSE STATE UT
ADDRESS [REDACTED] CITY 5 Tech STATE UT ZIP 84009
TELEPHONE [REDACTED] EMAIL [REDACTED]

I have been duly warned and advised by Officer MASON

I declare that the following voluntary statement is made to the aforesaid person of my own free will without coercion.

I understand that pursuant to Rule 1102, Utah Rules of Evidence and Section 76-5-504.5, Utah Code Annotated, the statements I am about to make in this document may be presented to a magistrate or a judge in lieu of my sworn testimony at a preliminary hearing. I also understand that any false statement I make and that I do not believe to be true may subject me to criminal punishment as a class A misdemeanor.

He sido debidamente advertido e informado por el agente

Declaro que la siguiente declaración voluntaria es dada a la susodicha persona libre y voluntariamente sin coerción.

Entiendo que de conformidad a la Regla 1102, de las Reglas de Evidencia de Utah sección 76-5-504-5, del Código de Utah Anotado, las declaraciones que estoy por hacer en este documento pueden ser presentadas a un magistrado o a un juez en lugar de mi testimonio jurado en una audiencia preliminar. También entiendo que cualquier declaración falsa que yo haga y que no crea que sea verdadera puede someterme a castigo penal como delito menor clase "A".

STATEMENT

At about 3:00 Daniel Kaufman & I were flying back from doing some private private pilot maneuvers to land at South Valley Airport. Sunday 11/6 At about 10 miles NW of the Airfield we checked over a Pange checklist that included weather which was 150° at 5 knots upon entering our traffic pattern. I checked it again the inside where 160° at 4 knots. I again said to Dan we were good for Sunday 11/6. Upon landing we touched down with no problems. I began to bring flaps up. Each time all things full to take off again. At about 100' AGL we started to lose power, little it was as if something grabbed to place and was pulling us to the ground. I checked full throttle, made sure our mixture was Rich. It was then that I realized that we had hit a major microburst. I immediately bled my flight

WITNESS STATEMENT CONTINUED

controls. I tried to power us through the microburst. When I realized that the microburst was too strong. ~~from~~ It has changed from a flood wind to a massive tail wind. It was like the tail wind was faster than our Air speed. ~~the microburst was~~ I then thought to turn into the wind but realized that was not best. As we got to about 100 feet off the ground and sinking fast I quickly turned to saving Daniel. I pulled power, popped down to slow us. I headed for a tree on my side to save him. Angels must be with us because we don't have a scratch. I walked away.

An officer ^{shultz} did say that an Army Guard pilot say that the microburst ~~of~~ Rocked the Guards Control Tower and they grounded their Black Hawks.

STATEMENT

We were practicing landings and as soon
as we took off we hit a huge gust of wind
that stopped us from lifting so Kelly took control
and tried to get us back up but nothing was
working so he put us down best he could in
the field.
