Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft , Front landing gear was torn off and wrinklied firewall, Bent rear landing gear, Left front & rear bent, Bent prop, Bent engine cowl. Thats what i could see.

Property , No damage

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

See attached letter

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

As the pilot, if I had more alt I maybe could have got to a airport to land.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Engine - Lycoming O320-E2D, L-28566-27A

Engine made a loud pop and began to vibrate like it was out of balance.

Accident on 9/16/2022

At 4:14 p.m. I departed from KSZP (Santa Paula) for a local flight with my daughter (Sydney Delahunt) and her boyfriend (Cole Maloney). As we departed, we climbed up to 2,000 MSL. I decided to get "Flight Following" from Pt Mugu approach and proceeded up to coast to Carpinteria. We made a 180 degree turn towards Ventura Harbor. I climbed up to 2,000 MSL and turned NE to head into Ojai Valley. As we leveled off, I pulled the power back to 2,200 RPM. About a minute later we heard a loud pop come from the engine which then began to shake violently. I then pulled the power back to idle and motor was still running but vibration was not as noticeable. I added throttle to about 1,200 to 1,300 RPM and it began to shake so I backed off throttle to idle. Then I notified Pt Mugu approach that I was having engine problem and turned toward coastline to exit the valley. Pt Mugu approach came back to tell me Oxnard was eight miles and Camarillo was ten miles away. At this point I was about 1,500 MSL on a glide path at 65 to 70 knots heading to Ventura. I replied that I would try to make it but, not sure I was going to be able to. When I reached Ventura, I was about 1,000 to 800 MSL. I then told Pt. Mugu approach that I was not going to be able to make it to Oxnard airport and my best option was the beach. He replied that he would send the authorities out. I was looking at the beach and trying to figure out the best possible spot to put the airplane down considering the beach was full of people as well as the rock jetty about every 1,000 ft or so. I told my daughter and her boyfriend to make sure their seatbelts were tight and once we get on the ground to exit the plane as soon as possible. I picked the last stretch of beach before the harbor, and I put the airplane down on the water line as to avoid people and ended up sliding along beach with full breaks towards the jetty. The airplane hit the rocks at about approximately 25 to 30 MPH. When we hit the rocks, the plane bounced up and turned right then came to a complete stop and falling down on the left side of airplane. As we proceeded to exit there was an off-duty fire fighter there to assist us. He helped Sydney and Cole out of the airplane on the passenger side and I exited the airplane out of pilot's side. By the time we were out the Ventura County Police were there to assist.
