

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: Superior State: MT

ZIP: 59872 Country: U.S.A.

Latitude: 47-10.1'N Longitude: 114-51.2'W

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 9/26/2022 Local Time: 15.30
mm/dd/yyyy

Time Zone: mountain time

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N12113

Manufacturer: Cessna

Model: C172M

Serial Number: 17261817

Year of Manufacture: 1973

Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Kit/Plans ☐ Make: _____
☐ Original Design

☒ IFR-Equipped and Certified

☐ Commercial Space Flight

☐ Unmanned Aircraft

Maximum Gross Weight: 2550 lbs

Weight at Time of Accident/Incident: 2072 lbs

Number of Seats: 4 Flight Crew Seats: 2

Cabin Crew Seats: 2 Passenger Seats: 2

Number of Engines: one

Category of Aircraft

- ☒ Airplane
☐ Balloon
☐ Blimp/Dirigible
☐ Glider
☐ Gyroplane
☐ Helicopter
☐ Powered Lift
☐ Rocket
☐ Ultralight
☐ Unknown

Type of Airworthiness Certificate

Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

The spiked wire-fence 's wires wrapped the fuselage and the wing surfaces and cut through in areas of the fuselage in some areas and the front tirewheel cover and the base of the tail. The nose in front of the propeller is bent. The airplane was standing up at the end of the of the accident. The engine stopped by itself I got out after assessing the situation from the airplane and began to call home and sheriff's office.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

Dear Officer in charge; I have not flown more than 6 months and on Sept. 26 2022 the weather was nearly good clear sky with calm wind. I decide to brush up and fly. I spent extra hour checking the aircraft. I started the engine which started the engine ~~which started~~ after a little hesitation. I taxied the aircraft to the empty parking area and exercised the driving since I have not flown a while. I became confident to fly, so taxied to end of the runway 30 but decided to again to simulate the take and landing. The wind was light and variable. When I came back to the end of the runway 30, I decided to take off to the west and I did. After I climbed to 6000 feet. I headed to East in same altitude of 6000 ft and circled 180 and returned to the airport and decided to land on the runway 12 which I did. There was no problem until I realized I was a little high and fast I decided to abort this landing. So climbed to 4000 ft and returned to pattern altitude and did the, beginning the landing the second time. I liked better this time and landed about the half way the runway ~~end~~. But this time the remaining runway end of the runway was approaching fast I applied the brakes hard to stop the aircraft but was ineffective the airplane ran over the asphalt portion of the runway and was keep going. I applied the rudders to steer the aircraft and also stop it but it did not steer either right nor left until it hit the fence.

Sir, this is the story and it is true story. I know there is lot to learn from this experience AND I KEEP SAYING TO MYSELF in retrospect that I could have done differently if I had another chance like this. Thanks for sympathizing and help.

In addition: I braked the aircraft hard but it did not stop. Nor responded to steering by ^{as usual} the ~~brakes~~ ^{rudders} either right or left ~~rudder~~. I still do not understand. The aircraft was on the runway from halfway to the dirt ground after the runway end. I can think many reasons but I do not know the real reason or reasons. The mechanic who was sent from FAA office stated the brakes were responding by pedal pressures of aircraft. I have been agonizing ^{everyday} after the accident but I could not explain ^{the reason} because I have been in situations like this ^{many times} since I have been a pilot in 1982 and flown ~~on~~ 1395 or some hours. Truly yours, Thank you ~~the officer~~

10/2/2022

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

* < my printer failed unexpectedly >
obviously mistake was made in decision making ~~to~~ ^{for} safely landing. The mistake was made by me. In doing that there was "point of no return". I should have made that decision with the plenty early landing. I violated that. This is the true statement. I thank God in my decision, though I made the mistake in this accident, because I am not injured.

[REDACTED]

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

I thought the braking systems failed on me. ^{But} my assumption was disputed by the professional mechanic from FAA and I am not going to ~~pursue~~ ^{peruse} it any further. (this matter is closed.)
