Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Top of the vertical stabilizer crunched (rudder undamaged), left wing strut kinked, top wing skins slight wrinkle, engine siezed, prop damaged.

No damage to grass seed field.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Cooling modifications were being made and test flights were being performed at different manifold pressures while noting changes in CHT temps.

The flight test area is just East of TTS over a rural area with lots of farm ground.

After approx 20 minutes of flight, the engine made rough sounds and shook (vibrated?), approx 20 seconds later (?), the prop locked up.

I recall being around 1200-1400 MSL or 700-900 AGL. Forced to choose a smaller field to avoid power lines, I rolled out about 200' and applied more braking as I was running out of room and the plane flipped over. I unbuckled & crawled out.

The local Sheriff's showed up along with the local fire dept.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Fly at a higher altitude and closer to the airport.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

I do not know the cause. It appears the engine sizzled.
