Good Afternoon Andrew,

The visit to Sonoma Jet Center went well.

When we arrived we were met by Spencer Pomerantz (Assistant General Manager) and Michael Gray (Line Service Manager).

They provided us with the attached documents which include the daily inspections for both fuel trucks used, receipts, and training records for the two employees who were responsible for fueling N153QS.

Additionally, after they were informed of the accident, the trucks were pulled off the line and re-inspected. (see attached)

The company has very good processes/procedures in place and everything is maintained in a database so it was easily accessed.

The trucks were clean, organized, and very well maintained.

Here are Spencer and Michael's contact information should you wish to speak to either or both of them:
