NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

Flying to 403 (Home Base) for landing - flew over wind sock for wind direction, was calm. Entered downwind for 09, as I entered base for 09 felt gust from west (270). As I turned final it calmed down, about 200 Alt from 09 wind gusted for west (tail wind). While trying to control speed to prevent stall I drifted to left side of runway landing left edge of 09. To avoid hitting runway light I overcorrected right rudder that resulted in ground loop to the right causing damage to left wing.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Should have done go Around And landed 270 (to west)
