

NATIONAL TRANSPORTATION SAFETY BOARD

NTSB Form 6120.1

PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

Email the pilot/operator aircraft accident/incident report to the investigator-in-charge of your accident/incident. If email is not available, mail the report per the instructions below.

If your accident/incident occurred in Maine, Vermont, New Hampshire, Massachusetts, Connecticut, Rhode Island, New York, New Jersey, Pennsylvania, Maryland, Delaware, Virginia, West Virginia, Kentucky, Tennessee, North Carolina, South Carolina, Mississippi, Alabama, Georgia, Florida, the District of Columbia, Puerto Rico, or the US Virgin Islands, send the form to: NTSB, ERA, 45065 Riverside Parkway, Ashburn, VA 20147.

If your accident/incident occurred in Ohio, Michigan, Indiana, Wisconsin, Illinois, Minnesota, Iowa, Missouri, Arkansas, Louisiana, North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, Texas, Colorado, or New Mexico, send the form to: NTSB, CEN, 4760 Oakland Street, Suite 500, Denver, CO 80239.

If your accident/incident occurred in Montana, Wyoming, Idaho, Utah, Arizona, Nevada, Washington, Oregon, California, Hawaii, or the territories of Guam or American Samoa, send the form to: NTSB, WPR, 505 South 336th Street, Suite 540, Federal Way, WA 98003.

If your accident/incident occurred in Alaska, send the form to: NTSB, ANC, 222 West 7th Avenue, Room 216, Box 11, Anchorage, AK 99513.

Rules pertaining to notification of aircraft accidents and incidents, as well as overdue aircraft are found in 49 Code of Federal Regulations (CFR) Part 830 http://www.ecfr.gov/cgi-bin/text-idx?c=ecfr&tpl=/ecfrbrowse/Title49/49cfr830_main_02.tpl. These rules state the authority of the NTSB, define accidents, incidents, injuries, and other terms, and provide procedures for initial and immediate notification of accidents and incidents by aircraft pilots/operators.

A. APPLICABILITY

The pilot/operator of an aircraft shall send a report to the office listed above, based on accident/incident location; immediate notification is required by 49 CFR 830.5(a). **The report shall be filed within 10 days after an accident for which notification is required by Section 830.5, or after 7 days if an overdue aircraft is still missing.**

An aircraft accident, as defined in 49 CFR 830.2, is determined as an occurrence that involves a fatality or serious injury, or substantial damage to the aircraft. For occurrences that do not involve a fatality, the determination that the occurrence is an accident can be appealed by writing to the Director, Office of Aviation Safety, NTSB, 490 L'Enfant Plaza, S.W., Washington, D.C. 20594.

INSTRUCTIONS TO PILOTS/OPERATORS FOR COMPLETING THIS FORM

It is necessary that ALL questions on this report be answered completely and accurately.

If more space is needed, continue on a blank sheet of paper.

Nearest City/Place: Use the name of the nearest community in the state where the accident/incident occurred.

Date/Time: Indicate the date and local time of the event. Be sure to indicate the time zone.

Phase of Operation: Indicate the phase of operation during which the accident/incident occurred.

Aircraft Information: Enter aircraft make and model information as indicated on the aircraft registration certificate, including series. If the involved aircraft is certified as "amateur-built," include the name of the producer of the kit or plans, unless an NTSB employee instructs otherwise.

Maximum Gross Weight: Enter the certificated maximum gross weight for the aircraft involved in the occurrence. This should be the same as the maximum gross weight indicated on the aircraft weight and balance documents.

Engine: Enter engine make and model information as indicated on the engine data plate.

The NTSB uses this form for aircraft accident prevention activities and for statistical purposes. NTSB regulations (49 CFR Part 830) require that **ALL** questions be answered completely and accurately. Completion of this form will take approximately 60 minutes. The NTSB does not guarantee the privacy of any information provided in this form. You need not complete this form unless it displays a valid OMB control number, in accordance with 5 C.F.R. § 1320.5(b), which applies to this collection of information.

B. DEFINITIONS

1. "Aircraft Accident" means an occurrence associated with the operation of an aircraft that takes place between the time any person boards the aircraft with the intention of flight and all such persons have disembarked, and in which any person suffers death, or serious injury, or in which the aircraft receives substantial damage. For purposes of this form, the definition of "aircraft accident" includes "unmanned aircraft accident," as defined at 49 CFR 830.2.

2. "Substantial Damage" means damage or failure that adversely affects the structural strength, performance or flight characteristics of the aircraft, and that would normally require major repair or replacement of the affected component. NOTE: Engine failure or damage limited to an engine if only one engine fails or is damaged, bent fairing or cowling, dented skin, small puncture holes in the skin or fabric, ground damage to rotor or propeller blades, and damage to landing gear, wheels, tires, flaps, engine accessories, brakes, or wing tips are not considered "substantial damage" for purposes of this report.

3. "Operator" means any person who causes or authorizes the operation of an aircraft, such as the owner, lessee, or bailee of an aircraft.

4. "Fatal Injury" means any injury that results in death within thirty (30) days of the accident.

5. "Serious Injury" means any injury that (1) requires hospitalization for more than 48 hours, commencing within 7 days from the date the injury was received; (2) results in a fracture of any bone (except simple fracture of fingers, toes, or nose); (3) causes severe hemorrhages, nerve, muscle, or tendon damage; (4) involves injury to any internal organ; or (5) involves second- or third-degree burns, or any burns affecting more than 5 percent of the body surface.

Type of Fire Extinguishing System: If a fire extinguishing system was used to fight an aircraft fire, specify the type(s) of extinguishing system(s) used. Examples include handheld extinguisher, engine fire bottle, cargo/baggage compartment fire suppression system, or airport emergency ground equipment.

Owner/Operator Information: Enter the owner information as shown on the registration certificate. Commercial operators, enter the operator information, including "doing business as" when applicable, as shown on the operator certificate.

Revenue Sightseeing Flight: Indicate whether the accident aircraft was conducting revenue sightseeing operations under 14 CFR Part 91 at the time of the accident.

Air Medical Flight: Indicate whether the accident flight was being conducted for the purpose of carrying medical personnel, patient(s), or organs.

Public Aircraft: Federal, state or local government flight operations such as official travel, law-enforcement, low-level observation, aerial application, firefighting, search and rescue, biological or geological resource management, or aeronautical research. Indicate whether the flight was conducted by the armed forces, federal, state, or local government.

Purpose of Flight: 14 CFR Parts 91, 103, 133, 136, and 137: Indicate the type of operation that was being conducted at the time of the occurrence using the following definitions:

AERIAL APPLICATION--Operations using an aircraft to perform aerial application or dispersion of any substance. Examples include agricultural, health, forestry, cloud seeding, firefighting, insect control, etc.

AERIAL OBSERVATION--These flights include aerial mapping/photography, patrol, search and rescue, hunting, highway traffic advisory, ranching, surveillance, oil and mineral exploration, criminal pursuit, fish spotting, etc.

AIR DROP--Aerial operations, other than aerial application, that are intended to release items in flight.

AIR RACE/SHOW--Includes any flight operations conducted as part of an organized air race or public demonstration.

BUSINESS--includes all personal flying without a paid professional crew for reasons associated with furthering a business, including transportation to and from business meetings or work. This does not include corporate/executive operations, air taxi, or commuter operations.

EXECUTIVE/CORPORATE--Company flying with a paid, professional crew.

FERRY--Non-revenue flight under a special flight or "ferry" permit. Refer to 14 CFR 21.197 for details of special flight permit issuance.

FLIGHT TEST--Flight for the purpose of investigating the flight characteristics of an aircraft/aircraft component or evaluating an applicant for a pilot certificate or rating.

INSTRUCTIONAL--Flying while under the supervision of a flight instructor or receiving air carrier training. Personal proficiency flight operations and personal flight reviews, as required by federal air regulations, are excluded.

OTHER WORK USE--Miscellaneous flight operations conducted for compensation or hire such as construction work (not 14 CFR Part 135 operation), parachuting, aerial advertising, towing gliders, etc.

PERSONAL--Flying for personal reasons (excludes business transportation) including pleasure or personal transportation. This also includes practice or proficiency flights performed under flight instructor supervision and not part of an approved flight training program.

POSITIONING--Non-revenue flight conducted for the primary purpose of relocating the aircraft. Examples include moving the aircraft to a maintenance facility or to load passengers or cargo etc.

UNKNOWN--Use only if the primary purpose of flight is not known.

Other Aircraft--Collision: For all accidents involving a collision with another aircraft, including parked aircraft, check "Collision with other aircraft" under Basic Information and complete this section indicating details about the OTHER aircraft involved in the collision.

Airport Information: Complete this section if the accident/incident occurred on approach, landing, takeoff, departure, or within 3 statute miles of an airport. Please refer to the FAA Airport/Facility Directory or other official source for airport information.

Airport Identifier: Provide the official 3 or 4 character airport identifier number.

Runway: Indicate the number of the runway used, including L, R, or C if applicable.

Runway/Landing Surface: Indicate the type of intended runway/landing surface (do not indicate surface conditions). If the surface type was mixed, check all that apply.

Condition of Runway/Landing Surface: Indicate the condition of the intended runway/landing surface. If multiple conditions existed at the time of the accident, check all that apply.

Weather Information at the Accident/Incident Site: Indicate the weather conditions reported at the accident/incident site at the time of occurrence. If no weather reporting was available for the accident/incident site, indicate the reported conditions at the nearest reporting site. Specify the weather reporting site identifier, the observation time, and distance from the accident/incident.

Sky/Lowest Cloud Condition: Indicate the height above ground level of the lowest cloud condition present at the time of the accident/incident and whether coverage was reported as few, scattered, broken or overcast. Also indicate the height above ground level and coverage of the lowest cloud ceiling present at the time of the accident/incident (reported as broken or overcast).

NOTAMs (D and FDC), AIRMETs, SIGMETs, PIREPs: Describe all NOTAMs (distant (D) or Flight Data Center (FDC), if known), AIRMETs, SIGMETs, and PIREPs in effect near the accident/incident.

Flight Crewmember Information: Indicate the category that best describes the capacity served by this flight crewmember at the time of the accident. The designators "Flight Crewmember 1" and "Flight Crewmember 2" do not refer to a specific pilot position or responsibility. If more than one pilot is aboard, they may be entered in any order and their capacity entered as appropriate.

Degree of Injury: See Definitions on the top half of Page 1 of the instructions. Minor injury is not defined. If an injury does not meet the criteria for another injury category, select Minor.

Date of Last Flight Review or Equivalent: Enter the date of the most recent flight review, or equivalent, completed by this pilot. Refer to 14 CFR 61.56 for accepted equivalents.

Type Ratings: List all type ratings on the pilot certificate. If the pilot holds no type ratings indicate "none." If the pilot holds a pilot certificate other than student and was flying an aircraft requiring an endorsement, enter the type and date of any logbook endorsement(s) for that aircraft. See 14 CFR 61 for examples of required endorsements.

Student Endorsements: If the pilot holds a student pilot certificate, enter all solo endorsements and dates on the student pilot certificate.

Flight Time: Complete the flight time matrix. Solo flight time should be included as "Pilot-in-Command (PIC)" and all dual flight instruction given should be included as "Time as Instructor."

Additional Flight Crewmembers: Complete this section if there were more than two required flight crewmembers on the aircraft. This also includes a check airman performing official duties but does not include cabin crew. State the capacity served by each included crewmember at the time of the accident.

Passenger(s)/Other Personnel: Enter identification and injury severity information for all passengers, cabin crew, and other personnel involved in the accident. See Page 1 of the instructions for the official definition of injury levels.

Several questions throughout the form allow for multiple responses; when appropriate, choose all responses that apply.

These instructions only pertain to major issue areas covered by NTSB Form 6120.1 Pilot/Operator Aircraft Accident/Incident Report. For additional definitions of questions and responses, please refer to www.nts.gov.

☐ Minor ☐ Destroyed
 ☐ Unknown

Aircraft Fire

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Explosion at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

The damage is currently being evaluated by others. The main visible damage appears to be from the firewall forward. The prop struck and also the front wheel is torn off. The cowling and propeller is damaged and engine is likely damaged. The left wing tip and beacon light is missing.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

1. Pilot Statement of the events of the flight. Departed Lakeview, KLV at 11:30 AM local time enroute to destination Carson City, KCXP. Activated VFR flight plan after taking off from KLV (squawk code required due to special TFR) Requested flight following to KCXP. Arrived at KCXP 3 miles south of the field approximately 1:55 PM local time. Wind had been fluctuating slightly on the METARs that day. Latest Foreflight METAR for KCXP showed winds Light and variable. AWOS at 2035z said winds 090 at 7 kts but had been fluctuating and we could hear other pilots for the previous 20 minutes on CTAF 123.0 had been using runway 27. Upon announcing on 123.0 CTAF THAT WE WERE PLANNING TO CROSS OVER MIDFIELD AND planned to ENTER A DOWNWIND FOR RUNWAY 27, ANOTHER PILOT, WHO HAD JUST LANDED ON RUNWAY 27 ADVISED THAT THE WIND HAD CHANGED DIRECTIONS, AND HE HAD A SKETCHY LANDING on 27 AND HE SAID THAT IT LOOKED LIKE THE WIND WAS NOW FAVORING RUNWAY 09 AND WE MIGHT CONSIDER LANDING ON 09 INSTEAD OF 27. WE VERIFIED THAT THE WIND SOCK WAS BLOWING DIRECTLY (HALF WIND SOCK) TOWARDS 09. I ANNOUNCED ON CTAF 123.0 THAT WE WERE GOING TO CHANGE PATTERN FOR RIGHT TRAFFIC RUNWAY 09 AND LAND ON RUNWAY 09, FULL STOP, CARSON CITY. ON FINAL APPROACH, I REALIZED I WAS A LITTLE TOO HIGH AND INCREASED THE FLAPS FROM 20° TO FULL FLAPS, AFTER GETTING INTO GROUND EFFECT THE STALL WARNING HORN WAS SQUEALING RIGHT BEFORE TOUCHDOWN, A GUST OF HEADWIND LIFTED US BACK UP, I LET THE AIRCRAFT SETTLE BACK DOWN AND RIGHT BEFORE TOUCHDOWN, ANOTHER GUST OF WIND PUSHED US UP AGAIN AND I increased the throttle to full and ATTEMPTED TO PERFORM A GO-AROUND AND THEN THE AIRCRAFT WAS HAVING TROUBLE MAINTAINING ALTITUDE AND THE WIND EVENTUALLY PUSHED THE AIRCRAFT TO THE LEFT, we flew over the grass median between runway 09 and taxi Way D. The airplane struggled to stay off the ground and continued to lose altitude slowly as we were able to just barely fly over the drainage ditch that runs down the center of the grass median. However, we continued to lose altitude and touched down on taxiway Delta at an approximate 45° angle and skidded across taxiway Delta, and then impacted another ditch on the other side of taxiway D, approximately 100 feet east of the fuel tanks located just north of midfield and taxiway Delta. I would estimate the speed to be approximately 50 to 60 mph. However, I was focusing on trying to keep the airplane flying, and did not get an exact speed from the airspeed indicator. I was pilot. The only other passenger was my wife Shelley, sitting in the right front seat. Crash occurred approximately 2:00 pm.

RECOMMENDATION (How could this accident/incident have been prevented?)**Operator/Owner Safety Recommendation**

I landed with full flaps which proved to make it difficult to perform a go around. I also believe that I may not have closed the carburetor heat upon initiating the go-around. I was unfortunately not anticipating a go around because the approach into ground effect was smooth and uneventful. I believe that we experienced an unexpected gust of head wind while in ground effect (while the stall horn was squealing) followed by a crosswind or quartering tail wind. I remember reaching for the flaps to raise them some to gain some speed but we were already pointed at a 45 degree off the runway toward the drainage ditch, I may have raised the flaps some (maybe between 30 and 40 degrees flaps) but I am unsure how much because my attention quickly was focused on getting over the first drainage ditch but we just ran out room and time before made the impact with the ditch off Taxiway D. I also noticed that the wind seemed to be changing constantly during the next two hours after the incident. Upon consultation with my CFI and aircraft owner, they believe that using the full 40 degrees of flaps was my biggest downfall. They informed me that other C172 models are limited to 30 degrees of flaps. I usually land with 20 degrees of flaps and never more than that in a crosswind. I do not recall any indication of any cross wind while on final approach. Things changed very suddenly in this situation. We have furnished a video that shows our final approach clearly while my wife Shelley Redenius was filming from inside the cockpit on her iPhone. However, and unfortunately she quit filming right as I initiated the go-around. The Airport Manager, Corey Jenkins, has also supplied a video that shows from a distance N4432R coming into view of the camera just as I believe we were hit with the headwind right before touchdown.

I have also provided a copy of the report that I gave to the Carson City Sherrif and a diagram (from Foreflight) showing the overhead view of the airport and a Red X indicating the crash/impact site which was a dirt ditch and bank approximately 100' east of the fuel tanks off Taxiway D (near midfield)

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

☐ Jet A-1

☐ Automotive

Other Services, if Any, Prior to Departure**EVACUATION OF AIRCRAFT**

Was an emergency evacuation of the aircraft performed? ☐ Yes ☒ No

Method of Exit – Describe how the occupants exited and how many occupants evacuated each location

I exited out of the left door after shutting off the fuel selector valve and master switch and pulled the mixture out as far as I could (the mixture knob seemed a bit bent). My wife's seat had slid forward off the tracks and she had told me she was hurt and thought her leg was broken. So I didn't attempt to move her. The Carson Fire Dept. ended up removing the right door to get her out and on a stretcher.

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

My wife Shelley Redenius, suffered a broken tibia and fibula in her left leg, she also broke her nose and fractured a bone in her left cheek in her face. She has other bruises on her torso and right arm. She was treated at Renown Medical Center in Reno and had surgery to install a titanium rod in her left leg and a surgery to straighten her broken nose. She was released from the hospital on Sunday afternoon August 27.

I chipped one of my lower bottom teeth (tooth has root canal and had been capped before). I also had only minor cuts to my right index finger and middle knuckle. I was sore with some whiplash on days 2 and 3 mainly but otherwise fine.

I HEREBY CERTIFY THAT THE ABOVE INFORMATION IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE
